

CAPABILITIES STATEMENT

EDUCATION

2/90 Sign Systems develops comprehensive interior and exterior wayfinding systems in higher education markets. With more than four decades of experience planning, installing, and maintaining signage systems, 2/90 has a proven history of successfully managing turnkey signage projects. We have manufactured and installed comprehensive architectural communication solutions for many prestigious commercial and government educational facilities.

Our 2/90 interior architectural facility signage systems and advanced fabrication capabilities allow us to create high-quality signage to complement the education environment. An extensive offering of colors, finishes and countless options with insert configurations, graphic elements, and product enhancements, provide a sustainable, modular interior sign solution for our higher education clients while strengthening their brand.

SERVICES:

- Assessment - review of existing sign program to include recommendations for improvement, as well as budget estimates for planning, product, and installation.
- Planning - create an effective strategy to meet all of your wayfinding needs while designing a functional, attractive and cost-effective solution.
- Manufacturing - quality materials, tightly controlled processes all made in the USA for the fastest lead-times.
- Installation - our expert installers ensure your signage goes up perfectly offering turnkey services including demolition and construction.
- Maintenance - protect your wayfinding investment with a plan to ensure your signs continue to function properly.

CAPABILITIES:

2/90's turnkey approach results in effective wayfinding solutions and cost-savings.

- Sign design and planning is performed by SEGD certified graphic designers.
- Modular sign systems designed for easy updates to accommodate facility and personnel changes.
- Project management by certified professionals utilizing innovative technology and reporting tools.
- Precise manufacturing tolerances ensure quality products for today and tomorrow.
- Proven on-time installation process that begins well before signs ship.
- Maintenance through SmartCare+ or web-based tools assure that signs are up-to-date and functioning as well as the day they were installed.
