Overview

To provide simple, safe, and sustainable air cleaning products that become valued solutions for our customers. Our products significantly improve IAQ in commercial applications where healthy indoor environments are essential to the function of the building. Genesis Air uses innovative technology to do more than filter particulate from the air. Our products use powerful groundbreaking technology to achieve the best available indoor air quality. The key benefits of our air cleaning products include a.) Significant reduction of microorganisms (viruses, bacteria, and fungi / mold) that are validated by 3rd party trusted laboratories. B.) Reduction of organic odors from common indoor VOCs, as well as products of cooking and combustion. C.) Minimal maintenance and longer lifecycle than other air cleaning technologies. D.) Available in a variety of configurations that allow the air cleaner to be located within air handling units, ductwork, roof curbs, or mounted directly in the space.
