Company Profile

1. **Company's Official Registered name** – AstroTurf Corporation
2. **Brief history of your company, including the year it was established.**

For many athletes and sport enthusiasts, the AstroTurf brand has redefined the way the game is played. AstroTurf invented the synthetic turf industry in 1965 and has, for decades, been known as a company focused on innovation, specialty manufacturing, and customer service. In 1958, the Ford Foundation allocated \$4.5 million to establish a research group called Educational Facilities Laboratories. One of the group's findings was that inner-city schools had too little green space. The report included the following call to action:

"Whoever invents for rooftop and playground a material that looks like grass and acts like grass, a turf-like substance on which a ball will bounce and a child will not, a covering that brings a slice of spring in Scarsdale to 14th Street in April, will have struck a blow for stability in the big city." A copy of the report ended up at Monsanto, and their Chemstrand division developed a new product which was tested at the Moses Brown School in Providence, Rhode Island in 1964. The product was called ChemGrass.

Astrodome, 1966

In 1965, the Houston Astros had opened the magnificent Astrodome, but grass would not grow and they needed a solution. Monsanto stepped up and by January of 1966, they were testing the product in the Astrodome. By the beginning of baseball season, ChemGrass was reborn as AstroTurf and a sports revolution began.

AstroTurf opened its manufacturing facility in Dalton, Georgia in 1968, and is still located there. Since 2016, it has operated under the umbrella of SportGroup. SportGroup, founded in 1969, is a global leader in artificial turf systems and running tracks. Prior to acquisition of AstroTurf and related turf entities, SportGroup reported a >€340 million annual turnover (2015) and around 1,000 employees. The company maintains production plants in Europe, North America and the Asia-Pacific region and operates in more than 70 countries. It has

Battle at Bristol, largest football game in history

manufactured and installed more than 7,000 fields and 16,000 tracks. It is a supplier of synthetic turf fields to the Olympic Games, including Rio (2016).

From its first use in the Houston AstroDome in 1966 AstroTurf has celebrated many milestones, including the first Super Bowl and first World Series on synthetic turf, as well as the development of many groundbreaking products. The company continues to

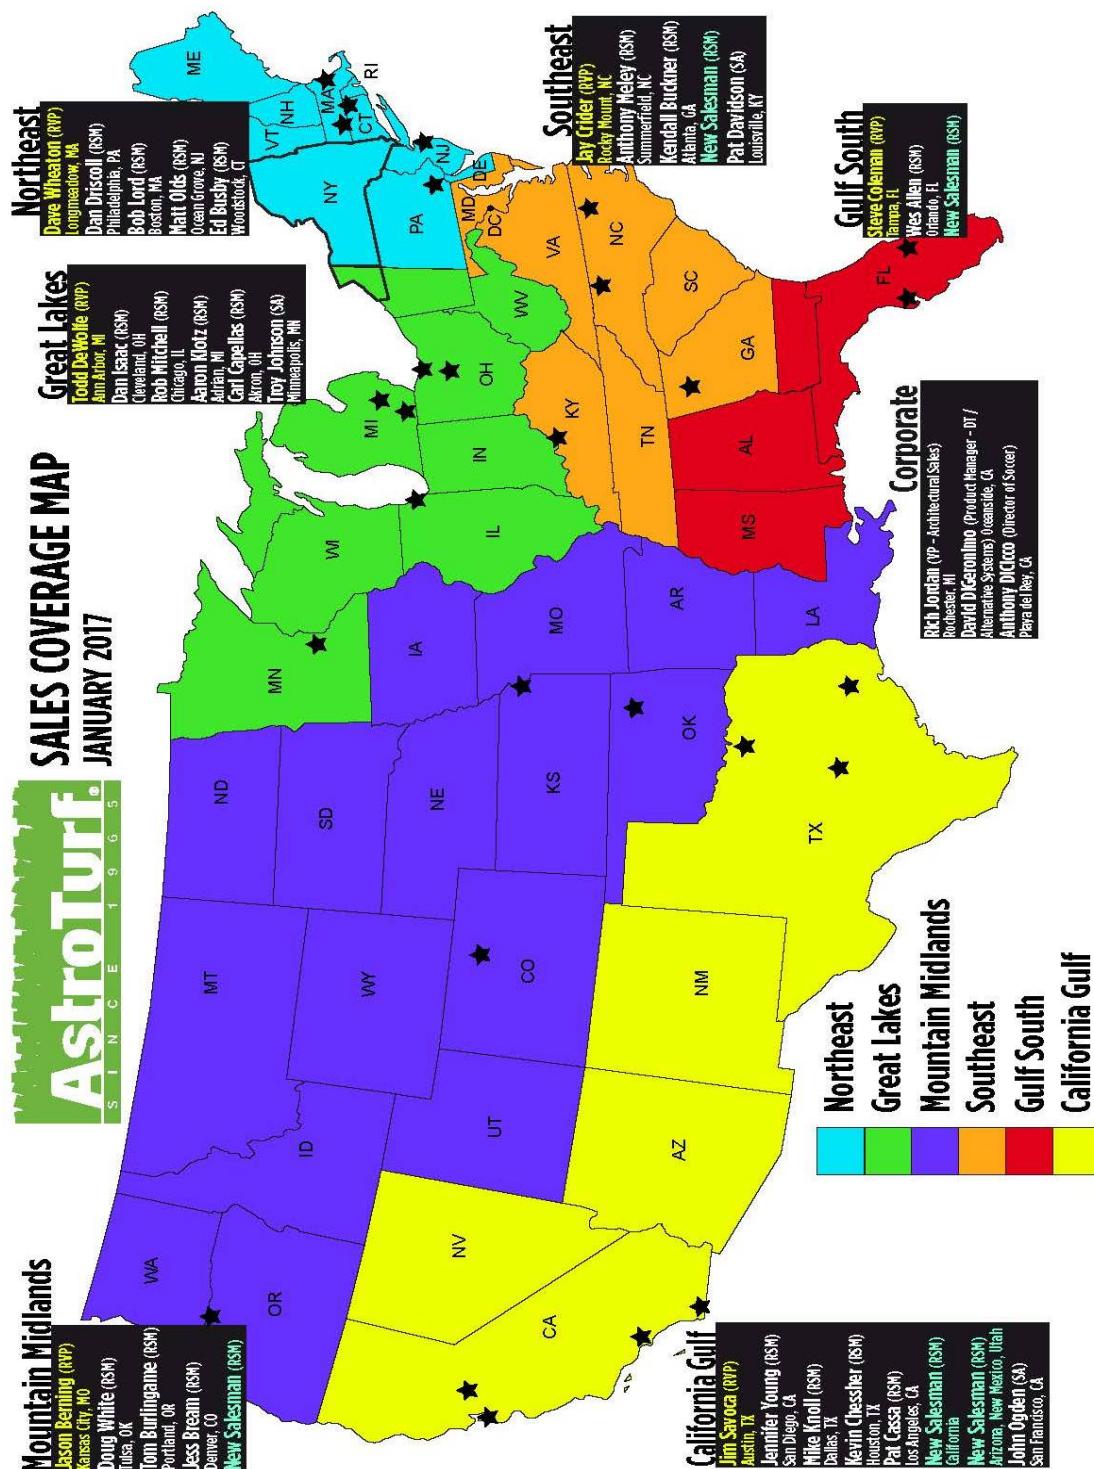

offer advanced, state-of-the-art, multi-sport and specialized synthetic turf systems with proprietary engineered technologies.

3. Corporate Office Location – Dalton, GA

4. List the total number of sales persons employed by your organization within the United States, broken down by market.

In the United States, AstroTurf employs 21 direct sales reps and six Regional Vice Presidents of Sales. We have furnished a sales map showing the sales rep network, which includes experienced senior Regional Sales Managers responsible for given territories. They do the reporting and tracking of sales in the region, motivate and direct the reps, and sell directly a certain number of personal accounts. On high-end or specialty sales, such as Convertible Systems (Magic Carpet, AstroHopper, AstroLift), hockey fields, baseball fields, and PRO/NCAA Division I accounts, we also assign headquarter-based product managers that help develop accounts and support sales reps in a specialized fashion. Small sales—generally under 30,000 square feet—are handled by our landscape and specialty sales group and are basically inside sales. Playing fields are sold on a highly intense, “consultant sales” basis by reps who have established relationships with school and university architects, engineers and designers; school officials; and local General Contractors.

5. List the number and location of offices, or service centers for all states being offered in solicitation. Additionally, list the names of key contacts at each location with title, address, phone and e-mail address.

Troy Squires, a long-time industry veteran, “re-joined” AstroTurf® as Global Director of Sales and Marketing in 2009. Prior to accepting this position, Troy led sales and marketing at FieldTurf International. Before this highly successful tenure at FieldTurf, Troy held a variety of senior positions at other turf companies, including C.O.O. at Southwest Recreational Industries (AstroTurf®), and Sales Director at All Pro/OmniTurf and SuperTurf. He began his career in the turf industry in 1979.

Troy graduated from Rice University in 1977, having attended on a football scholarship (“back in the old Southwest Conference days” but after leather helmets).

Troy directs an extensive network of company sales representatives and marketing support staff, including international dealers. After 20 years in Austin, TX, Troy has relocated to Dalton, Georgia. With Troy’s extensive background in manufacturing and product development (he has two turf patents to his credit, including the original concept of the Root Zone®), AstroTurf is intent on translating customer needs into product innovation. Troy puts a premium on customer satisfaction, pushing AstroTurf reps in consultative selling, matching AstroTurf’s many manufacturing assets with products that make a difference to clients large and small.

Perhaps Troy’s biggest success at AstroTurf has been in helping assemble a “dream team” of sales and operations experts with established track records of success and merging them into the existing AstroTurf family. Troy is continuously pushing the AstroTurf team forward to lead the industry.

11. What differentiates your company from competitors?

For many athletes and sport enthusiasts, the AstroTurf brand has redefined the way the game is played. AstroTurf invented the synthetic turf industry in 1965 and has, for decades, been known as a company focused on innovation, specialty manufacturing, and customer service.

OVERVIEW OF THE COMPANY (Business and Services Offered)

- I. SportGroup Holding and AstroTurf Corporation. The SportGroup (“SportGroup”) is the new parent company of the AstroTurf Corporation. SportGroup (www.sportgroup-holding.com) purchased AstroTurf and its sister companies, SynLawn and STR Manufacturing, in August, 2016. SportGroup is, worldwide, the market leader for manufacturing and installing outdoor synthetic sports surface systems. SportGroup has three main product groups—synthetic turf systems (sports turf systems including AstroTurf®, Poligras®, Ligaturf® and landscape systems such as SynLawn® and AstroLawn®); running tracks (Rekortan® and Sportan®) and playground systems. The purchase places AstroTurf into arguably the largest, most admired outdoor sports surfacing entity in the world.
- II. German Engineering meets American Manufacturing and Installation. As part of the SportGroup, AstroTurf and its sister companies bring unmatched manufacturing quality and delivery to customers in North America. It also benefits from the significant technical

investments made by SportGroup in R&D for the past decades. The result is a juggernaut of innovation, installation quality and manufacturing resources.

- a. Manufacturing. This includes (1) Synthetic Turf Resources Corporation (“STR”) the original AstroTurf *tufting/knitting/fiber extrusion plant* and sports surfacing *laboratory*; (2) the TURF STORE, of Calhoun, GA, who provides additional tufting capacity, logo cutting and assembly, Master Batch formulation, and specialty urethane coating on the most technically advanced coater using specially formulated urethanes for unmatched tuft bind and fabric strength; (3) fiber extrusion plants in Calhoun and Dalton, GA;; (4) ET-CUT technology using a robotic, water-jet logo and markings cutting facility in Calhoun, GA; and, (5) the turf PRE-FAB and inspection facility in Chatsworth, Georgia. No other company is vertically integrated in *this* manner and to this *depth*, going all the way upstream to Master Batch formulation. We can take product from raw polymer stage and convert it to an engineered turf system with virtually all components that we install and service ourselves.
 - b. Innovation. The combined forces of SportGroup and AstroTurf are second to none in terms of R&D and innovation. Collaboration has begun between AstroTurf and its famous sports lab and its German sister’s laboratories at Polytan. Add the specialty chemical research and expertise by sister-company APT in Harmony, PA and AstroTurf is uniquely positioned to leverage its reputation for innovation and quality even higher.
- III. AstroTurf has access to a very large bonding line—in excess of \$60,000,000—with additional bonding available as needed. This testifies to the financial strength and stability of the company. Although, as a privately held firm, SportGroup and AstroTurf do not have a need for and do not routinely provide audited financial statements, the company is one of the most financially stable in the entire industry. Its lack of debt is highly unusual in the turf industry. For additional information on our financial strength, please feel free to call our bonding company’s broker, John Lyman, our banker, or the CFO, Robb Carey. The company is capable of undertaking complex Design/Build projects, working as a supplier to a network of construction company dealers, as a direct bidder and builder of fields (including civil work) and as a provider of specialty components such as innovative subbase and drainage systems, world-class running tracks, E-layer® systems and field maintenance programs and niche market solutions, such as removable fields.
- IV. SportGroup companies are staffed by experienced plant managers and operators, research scientists, installation specialists, engineers, and contracts specialists. AstroTurf itself employs two landscape architects, three civil engineers, and several key managers with unmatched industry experience (more than a dozen of our key managers and engineers have more than 20

years' experience in the industry each). Our managers are industry veterans whose credentials can be confirmed by local and national design and construction firms. SportGroup companies, including AstroTurf®, STR and APT, are members of the SYNTHETIC TURF COUNCIL, the trade group formed to enhance industry initiatives and ethical conduct. Many of our managers, including Heard Smith, Troy Squires, Jim Petrucelli, Andy Belles, Ryan Paris, Mitchell Truban, Dr. Axel Hinrichs and Kris Brown serve on various STC, ASBA and ASTM technical committees. AstroTurf is a FIFA and FIH licensee and SportGroup as a whole has installed more FIH World Cup and Olympic Games fields and FIFA Recommended fields than any other entity.

- V. AstroTurf fields are covered by a 3rd party Warranty Insurance Policy, which is additional security for clients over and above the AstroTurf Manufacturer's Warranty (backed by both AstroTurf itself and its parent, along with component suppliers). In addition, AstroTurf maintains a Warranty Reserve for traditional warranty and service needs. And, we have in place arrangements with our regional installation specialists for general service and warranty repairs and with Sport Install, a national group of turf maintenance specialists, for in-depth, SportChamp-based turf cleaning programs. Our record for Warranty Performance is impeccable (i.e. what happens in the case of product or installation "failure"—which we will discuss below). We encourage clients to talk to other Owners in this regard as AstroTurf's approach is atypical in the industry.

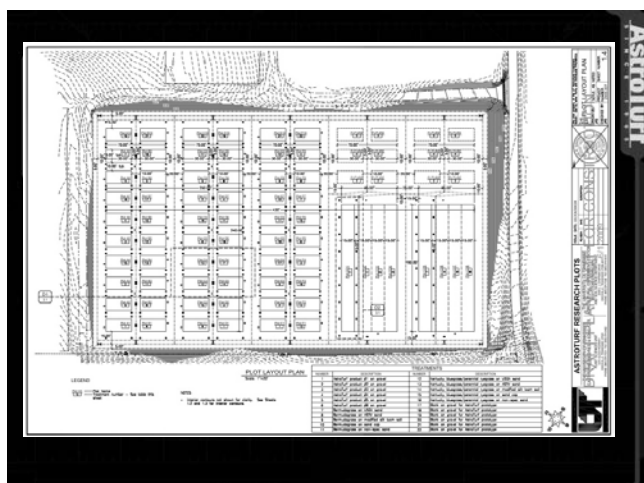

- VI. AstroTurf has its own in-house testing and turf research lab at the STR factory in Dalton, GA. This facility not only assures quality control via component and fabric testing of AstroTurf® systems, but also undertakes basic research and development for turf using a variety of testing equipment (three Lisport wear acceleration machines; the entire turf testing equipment needed for FIFA certification, including the Berlin Athlete; G-max shock attenuation equipment; QUV testing equipment for fiber UV exposure and environmental aging analysis; tensile and grab tear testers; and a variety of other ASTM, FIFA, FIH, IRB and DIN-based testing machinery). Many of these are portable, for in situ testing of fields.

AstroTurf's sports surface lab provides QUV testing, Lisport, Berlin Athlete and other product testing. In addition, it works closely with the extensive sports and fiber laboratories of its sister company, Polytan, in Germany.

Moreover, AstroTurf has funded the largest athletic field safety center in the country. The University of Tennessee and AstroTurf jointly perform basic research on synthetic *and* natural turf on the UT campus. This commitment represents a more than 2 million dollar investment by AstroTurf's owners.

VII. Our products are proven and incorporate the best components in the industry. We can make our own fibers, including nylon (which only AstroTurf can knit), and all our coatings; and we also use industry-best components.

a. AstroTurf has four conventional tufted turf systems, in addition to the knitted nylon AstroTurf 12 system:

i. Our SF (slit film) systems (with a parallel slit film XP fiber, which is stretched in TWO directions for better wear resistance);

ii. Our M (monofilament) and LigaTurf systems are FIFA-approved (with a special 360 micron thick HM ("High Micron") rough diamond-shaped monofilament fiber that is the most aesthetically superior, high performance fiber on the market);

iii. Our RootZone 3D systems (with the HM or XP fiber and a lower "RootZone®" of texturized monofilament with carbon black for superior infill stability (less rubber "fly-out" and infill migration), lower Gmax, and significant fiber reinforcement (to keep the PE fibers more upright which soccer and football players prefer).

- b. Our systems are filled with specially sized and cleaned SBR rubber on a layer of mined silica sand (on high-performance fields this is generally 50% rubber and 50% sand). We also offer non-SBR infills, such as TPE, Zeofill®, EPDM (which can be supplied by Melos, the world leader for sports EPDM, who is another sister company).
 - c. Our knitted nylon AstroTurf 12 system dominates the niche USA field hockey market while Poligras is the leading PE system for hockey.
 - d. Our exciting GREEN SERIES of DT, Organic infill, and NIKE Grind systems use no SBR rubber and provide lower surface temperatures for athletes.
 - e. Our unique *convertible systems* (Magic Carpet™II, Grasshopper™ and AstroMod) dominate the niche removable turf market.
- VIII. While AstroTurf certified installation specialists can sew field seams, we also offer our newest innovation, the “heat-and-pressure” activated **AstroFusion** process, which permanently welds seams with a metered, flame-activated layer of proprietary adhesive applied to a seaming tape *in the factory*.

View of AstroFusion™ heat/pressure seaming system, which is exclusive to AstroTurf systems.

- IX. Our installation crews are certified and some are unionized, which should fully negate any possible quality or labor-related issues on any site. They are based across the country to assure complete national coverage and rapid service when needed.
- X. AstroTurf employs a group of skilled Contracts Managers who shepherd projects from initial sales contact through Proposal Process, contracting, submittal process, material order and manufacturing, billing and close out.
- XI. AstroTurf also employs, in the various geographical areas, a group of Construction Managers. These are turf construction specialists who are for the most part *ASBA Certified Turf Builders* and are either engineers or construction science graduates with deep experience in building fields, from demolition through turf placement and client maintenance training.
- XII. Our CAD-based design department employs a landscape architect and design specialists with years of experience laying out turf fields for roll manufacturing, for submittals and “as built” close outs.

BUDGET ADHERENCE and PROBLEM SOLVING

- I. Weekly *JOB COST REPORTS*

- a. AstroTurf compiles and publishes a weekly JOB COST REPORT, which key managers review in detail. Its basic format is as follows:

Job ID	Job Description	Phase Description	Cost Code ID	Cost Code Description	Est. Expenses	Act. Expenses	Diff. Expenses	Act. Revenue
--------	-----------------	-------------------	--------------	-----------------------	---------------	---------------	----------------	--------------

This information is assiduously gathered by AstroTurf regional construction managers, turf superintendents and the payable department. It provides a weekly view of *each* ongoing project, enabling managers to maintain project controls on costs and to flag projects with overruns or potential problems.

- II. AstroTurf's Operations Team meets at a minimum once a week to review ongoing projects, from bidding phase through contracting, submittals, order processing, delivery schedules, crew logistics and mobilization, and construction/installation. This is led by Ryan Paris, Director of Operations, and consists of a team comprised of the Construction Managers, Contracts Administrators, the Director of Quality and others as needed, including sales and Senior Management.
- III. Problem Solving: Due to the nature of this difficult business—a mobile, specialty construction operation with full manufacturing support—AstroTurf has developed policies and processes specifically targeted at preventing problems traditionally associated with the synthetic turf sports facility business
 - a. On-time Delivery
 - i. Vertical Integration and sufficient capital for large component supply purchases has enabled AstroTurf to maintain a stellar on-time completion record.
 - b. Component failure (especially face fibers)
 - i. In-house QUV testing—AstroTurf has done comparative QUV testing for almost 30 years! ALL new fibers are thoroughly tested for UV stability prior to testing for other physical attributes as our philosophy is that most failures have occurred due to poor UV resistance first and foremost. We also QUV test competitive yarns and all master-batch change overs to assure quality in this regard. We are not aware that any other company has this kind of practice in place, especially with the ability to compare results with long-term testing and exposure going back almost 30 years.
 - ii. Lisport Testing—to determine resistance to wear
 - iii. Gmax testing—almost 30 years of records to compare to

c. System QC

- i. AstroTurf has in place the industry's longest and best QC program to test color match (electronic eye), fiber denier, pile weight and height, coating weight, grab tear and tuft bind.
- ii. We spot check rubber and sand sieves and retain samples off each project.

d. Installation Quality

i. Regional QC

1. We employ a group of experienced, trained and company-employed Construction Managers who inspect bases provided by third parties for planarity. This is critical for a quality installation.
2. These CM's observe and approve the installation of turf.

ii. General QC

1. We have a Quality Director (QD) who is independent, reporting directly to the President.
2. The QD inspects fields randomly and grades installation quality both subjectively and objectively, based on a set of criteria.
3. The QD must personally inspect any field with a customer complaint or warranty claim.
4. We have a Warranty/Service Manager who deals exclusively with customer service issues, especially relating to warranty claims and service programs.
5. The Regional Managers personally train customer Maintenance Personnel on the maintenance procedures necessary and the equipment supplied.

e. Warranty Claims and Performance

i. Company Philosophy

1. Our number one "Sales Tool" is a happy customer.
2. Warranty and service "after the sale" are perhaps the two most important issues that our customers consider important.
3. Customer calls are hardly ever frivolous and must be addressed immediately in any event.
4. We are not perfect—mistakes or problems can occur. The difference between AstroTurf and others is generally the way problems are dealt with—fairness, honesty and commitment to customer satisfaction must govern our actions.

ii. "Problem" fields

1. While our record for failure is excellent, we do recognize that a few fields have experienced problems.
2. Field replacement is a last resort, but sometimes inevitable.
3. AstroTurf has a superior record for Warranty Performance. Its insurance policy has never had a claim.

We provide this information to demonstrate the fact that AstroTurf has the resources and capacity to design, make, install and service all the sports turf needs both now and in the future. We are well financed, bonded, vertically integrated, experienced and focused on our market, which we “live and breathe” every day.

12. Describe the capabilities and functionality of your firm’s on-line catalog/ordering website.

Due to the nature of synthetic turf sales, online ordering is impossible. All fields must be customized to the dimensions, conditions, and specifications that always vary on a case by-case basis. However, our website (www.astroturf.com) has extensive product information and enables users to be put in touch with their local sales reps.

13. Describe your company’s Customer service Department (hours of operation, number of service centers, etc.).

AstroTurf has a dedicated webpage to lodge warranty and service requests. This action puts customers’ requests directly into AstroTurf’s automated project management software and immediately notifies our Quality Control team (comprised of 4 full time professionals). The Quality Control team is required to answer inquiries within 24 hours. In addition:

- We have a Quality Director (QD) who is independent, reporting directly to the President.
- The QD inspects fields randomly and grades installation quality both subjectively and objectively, based on a set of criteria.
- The QD must personally inspect any field with a customer complaint or warranty claim.
- Our Regional Construction Managers personally train customer Maintenance Personnel on the maintenance procedures necessary and the equipment supplied.

AstroTurf fields are covered by a 3rd party Warranty Insurance Policy, which is additional security for customers over and above the AstroTurf Manufacturer’s

Warranty (backed by both AstroTurf itself and its parent, along with component suppliers). In addition, AstroTurf maintains a Warranty Reserve for traditional warranty and service needs. And, we have in place arrangements with our regional installation specialists for general service and warranty repairs and with Sport Install, a national group of turf maintenance specialists, for in-depth, SportChamp-based turf cleaning programs. The difference between AstroTurf and others is generally the way problems are dealt with—fairness, honesty and commitment to customer satisfaction govern our actions.

14. Provide information regarding whether your firm, either presently or in the past, has been involved in any litigation bankruptcy, or reorganization.

Over the last several years, AstroTurf has experienced an unparalleled growth in market share and brand recognition, with a 250+% increase in sales between 2010 and 2015. It has been extremely gratifying to see the hard work of our sales, installation and R&D teams be recognized in the marketplace.

However, the time has come for the next chapter in the history of the AstroTurf brand, and indeed of the sports surfacing industry.

We are pleased to inform you that the sale of substantially all of AstroTurf’s assets to the SportGroup was approved by the Court on August 12, 2016 and closed on August 19, 2016. By joining the SportGroup, we have formed arguably the largest outdoor sports surfacing company in the world.

This sale was completed through Chapter 11 proceedings. This step was necessary in order to consummate the sale of AstroTurf to SportGroup free and clear of any liabilities associated with a patent lawsuit that originated in 2010 between AstroTurf, LLC and a competitor.

Now that the sale is closed, the AstroTurf brand is stronger than ever before. A new company called **AstroTurf Corporation** has been formed. This new company is not

involved in any patent litigation, nor is it in bankruptcy. We are well-funded, our third party insured warranty program remains in effect, our manufacturing capacity is expanded, and we maintain significant bonding capabilities. A summary of AstroTurf Corporation's strengths includes:

- Continuous warranty protection and strong customer commitment:
 - All past AstroTurf warranties have been assumed by the new owners through the court. This process is automatic and no action need be taken by clients. If clients have concerns about their field, all they should go to www.astroturf.com/contact/warranty-request/ to file a request to be contacted.
 - Future warranties are backed by enhanced financial stability
 - Our third party warranty insurance policy remains intact—there were no claims to our policy through the course of AstroTurf, LLC's bankruptcy
- \$60,000,000 bonding line
- Unencumbered by patent litigation (although AstroTurf will continue to employ court-approved protocols that ensure and demonstrate that it does not infringe on third party patents)
- Expanded product offerings:
 - More FIFA, FIH, and World Rugby-certified systems and pitches than ever before (SportGroup companies are FIFA, FIH and World Rugby "Preferred Providers")
 - Top-tier Olympic, World Cup-caliber surfaces
 - Legendary running track brands from Advanced Polymer Technology (APT), including Rekortan®
- We will retain all management, personnel, processes, infrastructure, manufacturing equipment, and intellectual property. At the same time, we will benefit from the SportGroup's assets, including expanded manufacturing capacities
- Opportunity for global collaboration on R&D initiatives

SportGroup—New Ownership for AstroTurf

SportGroup, founded in 1969, is a global leader in artificial turf systems and running tracks, with (prior to the AstroTurf acquisition) a >€340 million annual turnover (2015) and around 1,000 employees. The company maintains production plants in Europe, North America and the Asia-Pacific region and operates in more than 70 countries. It

has manufactured and installed more than 7,000 fields and 16,000 tracks. It is or has been a supplier of both fields and tracks to the Olympic Games. Its leading brands and companies include Polytan, APT, Melos, Rekortan, and Poligras, all industry leaders. It is often called the “Mercedes Benz” of the turf industry due to its high level of QC and product development. SportGroup is owned by Equistone, a well-regarded, well-funded equity group based in Europe.

This acquisition marks the next phase of our industry. It has strengthened the AstroTurf brand and enables us to bring even more innovations to market. As stated, we will be part of one of the largest sports surfacing companies in the world, and we are keenly focused on our future as the industry leader.

16. Describe how your company will demonstrate the benefits of this contract to eligible entities if awarded.

By far, government institutions compose the greatest segment of AstroTurf's customer base. For this reason, our seasoned sales, management, and administrative forces have developed an expert understanding of the intricacies of doing business with both the educational and municipal markets. A review of our list of references reveals that AstroTurf has extensive experience selling to and servicing the public sector, with hundreds of sports fields sold over the past few years alone. We have collective staff experience of well over 200 years specializing in sports facility sales to public institutions. The vital importance of this market has driven us to develop a consistent, managed, and focused approach to serving governmental institutions. For example, we comprehend the roles that are played at every level of the educational setting and realize that the complex interactions between facilities managers, coaches, athletic directors, school boards, and superintendents ultimately determine a school's selection of an athletic surface. As such, we strive to cultivate relationships with each of these players and facilitate communication between them. The need to build relationships with all decision makers is why we participate in more than 60 Education market trade shows annually.

Furthermore, our drive to entrench ourselves within the Education market is evidenced by our sales figures. Our reputation for outstanding customer service and product excellence is critical for properly serving this market and testifies to our dedicated approach to providing the highest quality athletic facilities to this market.

Our extensive experience with the government market and our commitment to quality are the bedrock of our firm belief in the co-operative purchasing model. Time and again, we have seen schools, in the face of diminished resources, waste time and dollars

conducting bids at the local level. Frequently, these schools select the lowest priced, worst quality products and services, often in direct opposition to the wishes of users and administrators within the organization. These choices are driven by short-term financial constraints, ignorance of other options, and customary practices; but they come at the long-term expense of students' safety and ultimately result in greater expense to the institutions and to taxpayers (through early replacements, the hassles of warranty claims, etc.). It is our belief and experience that schools buying AstroTurf products via a co-operative agreement pay consistently fair prices and receive consistently superior quality.

17. Explain how your company plans to market this agreement to existing government customers.

- Renovate our website to advertise the TIPS relationship.
- Continue to train our sales force, emphasizing the specific features, benefits, and advantages of co-operative purchasing in general and TIPS in particular. Especially
 - How using the co-op can save clients time and funds
 - How the co-op allows clients to get the special product features and systems it really desires, without having to bring unwanted features in from other vendors through a separate bid
 - How using the co-op option allows school personnel to focus on more pressing tasks at hand, thus leading to enhanced staff efficiency
- Mandate that each sales rep lead with the TIPS Agreement. "Leading" means
 - Introducing the concept of TIPS Cooperative Purchasing at the initial introduction of the company and products
 - Providing written FAQ sheet with initial literature placement or mailings
 - Explaining that the advantages provided by the co-op option include obtaining the best pricing available from the company
 - Explaining that even if a bid is solicited, AstroTurf will make the co-op option available in a cover letter to the bid itself, demonstrating that the product bid can be purchased more inexpensively by means of TIPS Cooperative Purchasing
- Drive home these advantages repeatedly, through company-wide meetings, regional meetings, and regular monthly TIPS meetings with updates—both in person and via webinars.
- Develop talking points and marketing materials for our sales staff to inform customers (both TIPS Members and future Members, i.e., schools with which we

have existing relationships) of our new Agreement and the opportunities presented therein.

- Continue strategic and training meetings with TIPS managers
- Exhibit our dedication to the long-term success of this Agreement by reviewing our sales and methodology on a quarterly basis and making adjustments as necessary.
- Provide a special commission on sales made by means of the co-op.

18. Provide a detailed ninety (90) day plan describing how the contract will be implemented within your firm.

Fortunately, AstroTurf has already embraced the TIPS relationship to great success. Hence, “implementation” per se will be unnecessary. However, within 90 days, AstroTurf will:

1. Announce the re-award within the company and externally
2. Ensure that the AstroTurf landing page on the TIPS landing page is updated with all updated due diligence documents
3. Continue to plan regional strategic meetings between TIPS and AstroTurf reps.
4. Continue to evaluate which trade shows make sense to co-attend.

19. Describe how you will train your national sales force on the TIPS agreement.

Within one month of award of a TIPS contract, Matt Olds (our team lead for the TIPS/ contract) and our senior management will facilitate a meeting with TIPS to present a specific, targeted plan of action that will ensure the mutual success of AstroTurf and the co-op. We anticipate a smooth transition into the execution of this renewed Agreement, as our staff already has extensive experience employing this co-op. To bolster our sales efforts, the following actions, as a minimum, will be taken:

- Renovate our website to advertise the TIPS relationship.
- Continue to train our sales force, emphasizing the specific features, benefits, and advantages of co-operative purchasing in general and TIPS in particular. Especially
 - How using the co-op can save clients time and funds
 - How the co-op allows clients to get the special product features and systems it really desires, without having to bring unwanted features in from other vendors through a separate bid
 - How using the co-op option allows school personnel to focus on more pressing tasks at hand, thus leading to enhanced staff efficiency
- Mandate that each sales rep lead with the TIPS Agreement. “Leading” means
 - Introducing the concept of TIPS Cooperative Purchasing at the initial introduction of the company and products

- Providing written FAQ sheet with initial literature placement or mailings
- Explaining that the advantages provided by the co-op option include obtaining the best pricing available from the company
- Explaining that even if a bid is solicited, AstroTurf will make the co-op option available in a cover letter to the bid itself, demonstrating that the product bid can be purchased more inexpensively by means of TIPS Cooperative Purchasing
- Drive home these advantages repeatedly, through company-wide meetings, regional meetings, and regular monthly TIPS meetings with updates—both in person and via webinars.
- Develop talking points and marketing materials for our sales staff to inform customers (both TIPS Members and future Members, i.e., schools with which we have existing relationships) of our new Agreement and the opportunities presented therein.
- Continue strategic and training meetings with TIPS managers
- Exhibit our dedication to the long-term success of this Agreement by reviewing our sales and methodology on a quarterly basis and making adjustments as necessary.
- Provide a special commission on sales made by means of the co-op.

20. Describe the capacity of your company to provide management reports, i.e., consolidated billing by location, time and attendance reports, etc. for each eligible agency.

AstroTurf uses Wrike, an integrated web-based project management tool for all jobs through all phases of the project, from sales to estimating to project management. As such, this information would be readily available upon request.

Green Initiatives

21. Please provide your company's environmental policy and/or green initiatives.

The AstroTurf brand is a symbol of innovation and problem-solving, and its commitment to environmental responsibility is unmatched. In fact, AstroTurf was first use in an athletic setting as a solution to an environmental quandary. The Houston AstroDome, opened in 1964, was a revolution in athletic architecture. While spectators marveled at its glass ceiling, players complained about missed pop-ups due to the glare created by the ceiling. The glass was painted and the glare was reduced, but a new problem arose: the grass in the AstroDome died without ample sunlight. As a result the first ever synthetic turf surface was

installed, and it was called AstroTurf. Hence, the AstroTurf brand was born out of environmental necessity and forward-thinking ingenuity.

Over the years our dedication to the environment has kept pace with the ever-growing need to conserve and protect our world's resources. AstroTurf did not stop at originating an industry that, according to estimates by the Synthetic Turf Council, saved up to six billion gallons of water in the U.S. alone in 2010. (For amplification of the environmental advantages of synthetic turf, see the BASF study). Rather, we have continued to invest in new technology that positively impacts our environment.

- **AstroTurf products are available with BioCel™ Technology:**
 - BioCel is a proprietary polyurethane turf coating that combines bio-based polyols and a highly-refined form of the mineral lignite to create a recyclable, environmentally friendly backing system that reduces landfill waste, dependence on foreign oils, and improves air quality. The manufacture of the backing system does not require any water.
 - BioCel production only utilizes domestically grown soybeans, which generates American jobs and reduces dependence on foreign oil.
 - BioCel production recycles plastic bottles, and many of the bottles used are recycled from Yellowstone and Grand Teton National Parks.
 - Celceram is an additive used in BioCel Technology. It is a reclaimed byproduct of coal combustion power plants (referred to as “coal fly ash”) that provides additional strength, bulk and durability to the BioCel product line due to its special pearl-like shape and fire hardened density. By using this material, BioCel eliminates the need to use mined calcium carbonate and reduces the need to dispose of the fly ash in landfills.
- **AstroTurf utilizes environmentally friendly infill materials:**
 - **AstroTurf was selected as the exclusive partner for Nike Grind.** is a palette of premium recycled materials used in a variety of settings, including synthetic turf infill. But it's much more than construction material. It's a way for architects, athletic facility managers and parks and recreation personnel to address both sustainability and surface performance at the same time. Nike Grind infill is prepared for use in AstroTurf fields through a series of steps. First, excess rubber from the manufacturing of shoes is collected. This rubber is engineered for human contact and conforms to Nike's stringent quality standards and Restricted Substances List (RSL). The rubber is chopped up and properly sized for field drainage and uniformity. Finally the infill is encapsulated with a premium green-colored coating that boosts resiliency and gives NRG fields the consistent and plush appearance clients expect.

- Crumb rubber infill is the most common infill used in the industry. A typical AstroTurf field with crumb rubber will keep up to 20,000 passenger tires out of landfills.

AstroTurf will repair or replace, as it deems necessary, those materials that exhibit such defects resulting from materials or workmanship, at no cost to the Owner.

AstroTurf also guarantees that the average GMax level of its field will not exceed 175 for the duration of the warranty. If the average of the GMax readings exceed 175 during the warranty period, AstroTurf will take whatever measures necessary, at no cost to the Owner, to return the GMax scores to, or below, 175.
