OneScreen™ Brings Simplicity, Productivity, and On-demand Support to Cochise College

Established in 1964, Cochise College is one of the first community colleges in Arizona. Today, the college provides associate-level education, professional development, and workforce training to about 14,000 students each year through their campuses, education centers, and online classes.

CHALLENGE

To better support their classroom and administrative needs, Cochise College wanted an all-in-one collaborative solution that included whiteboarding, computing, high-quality digital media play, and easy web access. Topping their list of priorities was ease of use, affordability, mobility and instant support.

Cochise College had two main challenges to address – one was in the classroom, and the other focused on providing a more efficient means of presenting and communicating during their monthly board meetings.

To start, the college teaches Spanish and Russian, and each course includes various CDs and movies that explain how to properly speak the language. Cochise’s instructors needed a straightforward tool that would play the digital material in the classrooms in high definition and allow them to simultaneously access the web, use whiteboarding capabilities, and view their curriculum.

In addition, every month Cochise administration holds a board meeting to train on current issues. The meetings normally took place in the boardroom, and if a presenter wanted to share information, it had to be done on a projection system that was difficult to use. Needless to say, the previous system proved to be inconvenient and was rarely used.

SOLUTION

OneScreen’s cost-efficient, all-in-one unit provided Cochise College with the solution needed to support their classroom and administrative board meetings – from instant web access and high-definition digital media play to advanced whiteboarding functionality.

After researching numerous solutions, Cochise College narrowed down their selections to two contenders – Mondopad and OneScreen. After using both units, OneScreen was victorious.

Throughout their campuses, the College has deployed eight OneScreens.

OneScreen is extremely easy to operate because users can use familiar tools. Mondopad utilizes propriety software, which makes it more difficult to learn and employ.”

Sue Nielsen, Director of Santa Cruz Center
Cochise College

RESULTS

Simplicity. Productivity. Mobility. Support. OneScreen has given Cochise College the ability to communicate more effectively with their students and colleagues through video, audio, the web, and enhanced whiteboarding functionality and presentation tools..

The OneScreen units are used every day not only by the College's staff, but also by its students. Instructors can now share course materials on OneScreen's impressive HD 70" touch screen – from interactive whiteboarding presentations to online applications and videos.

Administration is benefiting from the OneScreen units also. The College's monthly board meetings are now more effective. Instead of having to use an outdated, difficult to operate technology in their boardroom, administration now has a mobile, user-friendly, all-in-one screen solution that effortlessly moves from the classrooms to the conference rooms. And, sharing information like schedules and current happenings is one click away.

The OneScreens have also quickly become a popular collaboration tool with Cochise's students and community members. Students now share their presentations on the units, and community members like the county library, ask if they can borrow the OneScreens.

Using OneScreen has become a favorite among our students. OneScreen motivates them to create more engaging presentations while not having to worry about using a projector."

Sue Nielsen, Director of Santa Cruz Center
Cochise College

Overall, using OneScreen has improved the way Cochise College communicates and collaborates with their students and colleagues as well as effectively training their staff on critical issues.

Because technology is constantly evolving, any equipment we purchase normally has to be updated within five to six years. Therefore, we looked for something that was cost-efficient, easy to use and operate, mobile, and offered on-demand support. OneScreen checked every box."

Flin Flon School Division students and faculty collaborate between four schools at the touch of a finger.

Founded in 1950, the Flin Flon School Division, headquartered in Manitoba Canada, is a culturally diverse educational community working together to provide public education services to the residents of Flin Flon and surrounding areas. The Division supports over 1000 students attending four schools, including a K-8 community, K-8 dual track, high school, and an alternative education/adult education school.

CHALLENGE

Find a video conferencing and collaboration product that offers out-of-the-box compatibility with existing technology, on-site portability, and advanced collaboration capabilities that remain user-friendly.

In order to promote and deliver interactive, rich learning experiences, Flin Flon required advanced collaboration capabilities that could be easily accessed and used by students and faculty alike. Also high on the school division's list of priorities was portability and reliability.

With four school campuses located throughout their division, Flin Flon needed a user-friendly solution that would give faculty and students the capability to interact and collaborate between the campuses throughout their Division. As a short-term solution, the Division had previously deployed Polycom and Tandberg video conferencing software. In order to capitalize on this previous investment, the Division needed a video conferencing solution compatible with their Polycom and Tandberg video conferencing software.

“After using it for the first time, I was instantly impressed by how simple and easy to operate the OneScreen is. I really enjoy having everything at one location; the software, hardware and applications are all integrated within the system.”

John Nicol, IT Manager and Computer Tech
Flin Flon School Division

“With OneScreen in place, now video conferencing with our other locations which use Polycom and Tanberg is just one click away.”

John Nicol, IT Manager and Computer Tech
Flin Flon School Division

SOLUTION

OneScreen interactive collaboration hubware, delivered standard with Hitachi StarBoard whiteboard software, installed on Chief rolling cart.

After exploring several different video conferencing solutions, Flin Flon unanimously chose OneScreen. An easy-to-use, portable, and reliable solution that seamlessly interoperates with Polycom and Tandberg solutions, OneScreen offered Flin Flon the value of reliability and paired it with remarkable audio/video quality. The Division also liked the fact that OneScreen was up and running without any complex installation delays.

RESULTS

OneScreen portable hubware solution has simplified the collaboration challenges Flin Flon School Division previously experienced.

They now have a user-friendly, fully integrated solution to instantly and reliably connect with all campuses through OneScreen. With fully compatible and reliable capabilities, OneScreen provides a highly effective answer for making point-to-point and multi-party video-enabled calls.

School District Accelerates Productivity with OneScreen™ Video Collaboration

Kermit Independent School District solves their need for real-time video collaboration, in-room touch screen, and all-in-one solution with OneScreen.

Founded in 1928, Kermit Independent School District (ISD) is a Texas public school district that serves students in northeastern Winkler County. Located in Kermit, Texas, the district consists of three campuses – an elementary school, a junior high school, and a high school.

CHALLENGE

Looking to improve their technological approach to distant learning classes, staff meetings, and sharing sessions, Kermit ISD required an affordable collaboration solution that seamlessly integrated with their existing Tandberg video conferencing technology. The District wanted a more effective means to collaborate, discuss, and share in real time, so the solution needed to be user-friendly and combine high-definition video conferencing, whiteboarding, and computing.

Kermit ISD faced two big challenges. The first was the complex and incompatible tools they had been using to conduct staff meetings and deliver distant learning experiences to the students. In both instances, Kermit ISD had to use separate technology for video conferencing than for presenting information, as the two were not interoperable. The process of making the individual technologies work together caused annoying delays and oftentimes resulted in complications.

In addition, the District needed a smarter way to communicate with their legal and migrant departments, which handled the change of schools for their students. To help improve the overall situation, the District sought a simple, highly user-friendly solution that seamlessly combined video conferencing and real-time information sharing. In addition to this, they wanted to provide both teachers and administration with the flexibility to use a single set of integrated software tools and applications that sat in one place.

Overall, Kermit needed an advanced, integrated, yet simple to use and maintain, collaboration solution.

We looked at other all-in-one collaboration solution options, and OneScreen unanimously became our first (and only) choice due to its superior set of user-friendly features and easy to maintain hardware.

Melinda Marshall, Technology Director
Kermit Independent School District

SOLUTION

Kermit ISD purchased five OneScreens to cover all of their campus locations. OneScreen's interactive collaboration hubware has provided them with an affordable way to combine Tandberg video conferencing and enhanced presentation functionality and includes progressive whiteboarding tools from Hitachi StarBoard, in an easy-to-use solution.

After assessing many visual collaboration solutions in the market, including Mondopad, Kermit ISD chose OneScreen due to its affordability, advanced features, and on-demand customer support.

OneScreen aligns with the way Kermit's staff needs to work and collaborate on a day-to-day basis, and also provides centralized access to all applications and tools from one single screen.

RESULTS

Connecting staff and students is now simple and instantaneous with the plug-and-play OneScreen. And through any OneScreen unit Kermit ISD staff and students have on-demand access to the benefits of intuitive, interactive whiteboarding, video conferencing, computing, document sharing and annotation, all on an advanced, yet simple to use and maintain, collaboration solution.

OneScreen's superior audio and video quality, paired with its whiteboarding features, means the District is now more productive and connected to both their students and staff. Through the use of OneScreen's whiteboard capabilities, staff meetings have become more interactive and educational. During meetings, Kermit ISD's staff can now easily share work sessions and electronic board books with the board members -- without the delay and complexity they had experienced with their old systems.

The OneScreens have also helped provide a higher standard of teaching and learning throughout the District. Students now effortlessly connect via video conferencing between campuses and experience learning as if they were in a traditional classroom setting. Furthermore, OneScreen enables Kermit ISD to collaborate effectively with other schools that are using Tandberg technology.

We can now reach all of the students within our district more effectively with OneScreen. The endless capabilities of our OneScreen units have given our distant learning program new and exciting possibilities. Our students have taken notice and are thrilled with the new technology – so is our administrative staff and teachers.

BREAKING DOWN BARRIERS

www.onscreensolutions.com

In a small town of Khyber Pakhtunkhwa, a province nestled in the north western region of Pakistan, children are heading out to school. The school is situated near a small town, easily accessible to parents and their children. A girl, Mahgul, sits in an overcrowded classroom and watches her teacher write on a chalkboard. She is asked a question and answers correctly, but yearns to learn beyond the conventional methods of teaching. She is glad that she came early today. Being late usually means getting to sit in the back of the class, giving her a mere chance of participating. Mahgul sees the daily struggle that her teacher goes through, and is distressed by the lack of knowledge gained by students during the limited school hours. She begins to think to herself "There must be a better way."

The unrest within KPK had a tremendous effect on the education system, where the classrooms were not adequately equipped, nor were the teachers provided with basic facilities. However, in recent years Muhammad Atif, an emerging PTI leader from Mardan and the Education Minister of KPK, is taking bold measures to implement PTI's manifesto. He has empowered the KPK E&SE department to choose best technologies and teachers to enhance traditional and blended learning in classrooms. Under the supervision of KPK Chief Minister, Atif has successfully initiated the first step of liberating the young community of KPK, and delivering an opportunity for them to excel in all fields of life. Imran Khan's dream for Pakistan is to promote the significance of education and witness a Pakistan where the youth is skilled, well-educated and enlightened, and Atif has proven to be an excellent choice to deliver on this dream.

One of PTI's major achievements in KPK is a project that plays a vital role in establishing a strong technology base for elementary and secondary education. KPK E&SE department together with the KPK IT planning department have worked relentlessly to become the pioneers of introducing quality teaching methodologies, like OneScreen multi-touch screens with annotation & swap learning software, for teachers to facilitate learning in a more collaborative environment. Five hundred schools are now benefiting every day from the OneScreen enabled IT labs all over KPK, and the departments are looking forward to expanding this initiative to over two thousand schools during the current tenure of the PTI government.

In another part of the world, a successful US based Pakistani Entrepreneur, Sufian Munir was keen to invest in the education sector of Pakistan. In KPK, he found a government that met this criteria. Sufian is the CEO of Clary Icon, an organization that manufactures OneScreen solutions. Recognising the brilliance of OneScreen, KPK ES&E department seized the opportunity to provide this ground-breaking educational system to the community of KPK. Today, young children in five hundred schools benefit from the same OneScreen technology that is being leveraged by the educators and students of Ivy League educational institutions such as Princeton University, Columbia University and other well reputed universities in Pakistan like LUMS etc. This is a huge initiative enabling valuable talent of KPK to come forward and compete on international forums.

Other projects initiated by KPK ES&E department under PTI's leadership include the training of **83,000** local teachers by qualified British Council professors, new school structures with solar power & container based smart schools, which takes them many steps ahead in competing with the global education system.

In a school of KPK, Mahgul sits in a technologically advanced classroom. The teacher points at the huge OneScreen touch-screen to deliver digital educational content. Her teacher makes a video call and suddenly the whole classroom begins to interact with another class full of students sitting in another part of the world. All the lectures can be captured and redistributed. Mahgul is mesmerised that they are now able to connect to international platforms with the touch of a finger. She is now able to record, save and share the same experience with her friend, who does not have the resources to attend school. With OneScreen, the educators of KPK have been enabled to incorporate distant learning, collaboration, discussions and sharing in real-time through HD video conferencing, whiteboarding and computing. OneScreen also provides endless opportunities such as Microsoft training after school hours and entrepreneurial classes in the evening. Mahgul is now pleased to see her time being utilised productively, as the classroom sessions are monitored. Mahgul has a wide grin on her face and she thinks to herself "So there is a better way."

Working together

How dispersed teams make secure, critical connections in one touch, with OneScreen™

INTRODUCTION

The Department of Health, Washington DC (DOH) is an enterprise size organization made up of over thirty different agencies that all work together each day, from multiple locations. The DOH teams work at top speed and with critical, highly secure information and need reliable, flexible technology tools that work seamlessly together to support their communication and collaboration efforts.

THE SITUATION

The DOH agencies had acquired a large array of existing communications technologies – both software and hardware - which meant that many separate and dispersed teams that needed to easily work together were using disparate technologies that didn't offer adequate integration, functionality, or security. An extensive amount of time and money was wasted trying to make these diverse systems work collectively.

Also, this line of work involves a regular exchange amongst team members in alternate locations in real time. The DOH needed a collaboration tool that was able to securely and immediately connect teams of people in different locations, allow them to share and annotate on critical information, and also work from practically any device - all at the click of a mouse.

The biggest challenges the DOH teams faced:

1. The teams are dispersed. Some work from the road, some work from the office, and some from home, each using different types of communication devices.
2. The teams need to know who is online and available in real time and then have the ability to connect instantly.
3. The teams need to securely display, annotate on, and directly exchange all types of content to team members in real time.

Since the DOH is made up of numerous agencies several problems were encountered while trying to integrate dispersed teams. The DOH teams had been relying on multiple, disparate collaboration tools that were not inter operable. The teams were unable to know which communication and collaboration tools any other team members were using and whether or not a given combination of platforms and software could connect with, share, or display content and video with the other. This created a dysfunctional environment and had a negative impact on productivity and efficiency.

Moreover, the collaboration technologies the DOH used were incapable of fulfilling their requirements. The technology tools did not provide the functionality needed to work together beyond the conference room with remote teams, and did not provide essential functionality such as online contact status and annotation that can be securely recorded, saved and shared with all meeting participants in real time.

THE SOLUTION

OneScreen is the easy to use, all-in-one communication solution that the DOH teams use each day to quickly connect with their dispersed teams from the conference room and the road. With OneScreen these dispersed teams now have immediate, reliable access to each other, the ability to share visual content, the ability to mark-up content and share it directly, and the ability to clearly communicate critical information, all at a moment's notice. OneScreen has the ability to operate as a single cohesive technology that focuses on creating synergy amongst disparate teams – beyond the conference room.

The DOH chose OneScreen and now they can:

1. Connect via video, audio, web, or whiteboard with any team member, wherever they are with one click.
2. See all team members' online status and know who is available at any time.
3. Display content for all to see, plus annotate and directly send all types of content to team members.
4. Securely record, store, and provide access to, sensitive video sessions and content.
5. Deliver effective, consistent training for dispersed and remote teams.

OneScreen provides the critical functionality needed for the DOH teams in a single all-in-one solution. And, OneScreen is a plug-and-play, touch solution that securely integrates with other codecs, is cost effective, and easy to use. OneScreen offers a quick, clean install, with quality design and unlimited, free training.

OneScreen Connects Alameda City's Fire Department with Simplified High-Definition Video Conferencing Solution

Founded in 1876, Alameda Fire Department is made up of four fire stations and two administrative offices in Alameda, California. Working together, the Department is dedicated to providing a high level of public safety services for their community of over 76,000 residents.

CHALLENGE

The City of Alameda's Fire Department found it challenging to connect all of their personnel in real time AND visually share, access, and collaborate on files and applications located on their network.

Due to the nature of their mission, Alameda Fire Department personnel need to remain at their respective stations during on-call hours. With four fire stations and two administrative offices, the Department found it difficult to schedule meetings and training sessions that all required participants (both on-duty and off duty) could participate in.

Previously using the Adobe Connect web conferencing platform, the Fire Department frequently experienced excessive latency during their on-site meetings. To add to their dissatisfaction, personnel regularly experienced connection problems when trying to join video conferences from laptops and other mobile devices. Furthermore, the Adobe platform lacked the hardware and tools the Department needed to easily collaborate and share information.

We were particularly awe-struck by the quality of OneScreen's HD video conferencing capabilities. The unit provides staff members with a practically "in-person" experience and lag time was non-existent. All I can say is "Wow!"

Chief Daren Olson | City of Alameda Fire Department

SOLUTION

The City of Alameda's Fire Department purchased two OneScreen hubware units, which were placed at two different stations. The Department now takes advantage of OneScreen's high-definition video conferencing, whiteboarding, presenting, training, annotating, and sharing features.

With a clear understanding of Alameda Fire Department's needs, a OneScreen representative tailored a customized demonstration of the solution for the City's Department Chiefs. The Chiefs were not only extremely impressed by what they saw, but they also liked the price tag. As a result, the Department purchased two OneScreen all-in-one hubware units.

OneScreen not only offers high definition video conferencing and computing, but also operates on Microsoft Windows 7 - an operating system with which the City's Fire Department is already familiar and comfortable. The Department also optimizes the OneScreen solution by utilizing new software upgrades and complimentary accounts for OneScreen SoftServe – a collaboration hub in the cloud that offers streamlined remote connectivity and productivity.

In special partnership with

HITACHI

RESULTS

OneScreen's simplified HD video conferencing, coupled with easy collaboration tools on one simple device, now provide the City of Alameda's Fire Department with affordable audio, video, presentation and training tools that don't compromise quality.

Versatile and simple to use, OneScreen equips the Alameda Fire Department with the ability to conduct audio and video meeting on their terms, with no latency. Personnel can easily join from fire stations, administrative offices or from their own device. In any case, connectivity is always seamless. Department Chiefs and administration now effortlessly share meeting agendas, notes and collaborate on action items using OneScreen 60" and 70" screens.

“

Our OneScreen units have connected us better as a department. Our meetings are now more collaborative and we can instantly connect with other stations with a single touch.”

EUGENA GARCIA

DEPUTY CHIEF, CITY OF LAS VEGAS

“We are extremely happy with our purchase of the Clary Icon OneScreen a few months ago. In the last month we have used it to improve the quality of our presentations and to facilitate our meetings. We love the fact that it requires no external computer to function and the all-in-one features. Furthermore, the quality of picture and sound is terrific and, as far as we can tell, like no other similar product on the market today. The Clary team has been wonderful throughout the installation process, providing us with all the support we needed. We plan to get more training from Clary in the near future, in order to get more familiar with the teleconferencing feature and the interactive whiteboard.

I would definitely recommend Clary Icon OneScreen to companies and other professionals. The price point is also very reasonable for such an all-inclusive product!”

The Clary folks have been so spectacular; helpful, knowledgeable, and friendly. This product is something I would recommend to other companies and professionals as a perfect addition to their meeting rooms.”
