**Required Federal contract provisions of Federal Regulations for Construction Contracts  
for contracts with TIPS OR TIPS MEMBERS**

The following provisions are required to be in place and agreed if the procurement is funded in any part with federal funds.

The TIPS OR TIPS MEMBERS is the subgrantee or Subrecipient by definition. The Rules are located in 2 CFR PART 200 - Appendix II to Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards at 2 CFR PART 200

In addition to other provisions required by the Federal agency or non-Federal entity, all contracts made by the non-Federal entity under the Federal award must contain provisions covering the following, as applicable.

(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to Federal Rule (D) above, when federal funds are expended by TIPS OR TIPS MEMBERS, during the term of an award for all contracts and subgrants for construction or repair, when Federal Funds are expended, by the TIPS OR TIPS MEMBERS resulting for this procurement process the vendor will be in compliance with all provisions listed or referenced therein.

Does vendor agree? YES MB Initial of Authorized Company Official

(E) Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-Federal entity in excess of \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be

required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Pursuant to Federal Rule above, when federal funds are expended by TIPS or TIPS Members, the proposer certifies that during the term of an award by the TIPS OR TIPS MEMBERS resulting from this procurement process for construction contracts awarded by grantees and subgrantees the proposer agrees to be in compliance with all requirements listed or referenced therein.

Whether you are designing an on-campus coffee house or a large-scale cafeteria, FurnitureLab™ tables and chairs can feature school logos or mascots. Laminate table tops can even be printed with school memorabilia – anything goes!

FurnitureLab™ products are a great addition to many places on campus besides food service. How about that gathering space in a residence hall or FlipTop™ tables in multi-purpose spaces? Some colleges have even used our conference tables in their meeting rooms.

The project shown above features our Mercury booths, PVC table tops and Classic bases in the NC State University cafeteria.

The project at right for the University of North Carolina features a series of graphic tables for all their different teams, paired with Fusion chairs which sport the school logo.

# Booth Seating

We offer four basic booth styles which we build to your specifications. Select a style and type of back; choose Vinyl Selections (p.144), Fabric Selections (p.140–143) or customer-supplied material for the seat and back. Booths can be produced with a closed black base or an open base using legs. We offer all the standard shapes and can build custom shapes as well.

## 20-20 Search Criteria

Search by the model name in the Part Description, for example "Mercury". All variations of that model will appear; based on shape and height.

## CAD Capabilities

Free CAD symbols, CAD renderings and space planning services available

## Custom Booths

Our ability to build custom booths to your specifications greatly expands the possibilities. You can specify virtually any type of booth shape, dimension, tufting style, or material. We can work from CAD drawings, sketches, or your description and dimensions to build a booth that suits your needs.

These photographs illustrate how we did this for the Big View Diner in Charlotte, NC. We worked with their designer and owner to develop these unique booths. These booths were built to custom dimensions, with special materials and used a tile-like tufting style.

The above shapes were created to fit in their entrance, giving their customers a comfortable place to wait as their table is prepared. We built these shapes using a combination of architectural drawings and field measurements to ensure a good fit.

# Built to Last

FurnitureLab™ booth construction is the best in the industry. Booths take a lot of abuse and we take every precaution to ensure they will perform well.

Seats are removable.

## Back

Solid wood frame with presswood backing covered with a cloth layer, polyfoam, woven polypropelene fiber batting, and fabric or vinyl surface

# Graphic Laminate Tops

There's no better way to add value to a project than to do something unique with the tables. FurnitureLab™ allows you to put graphics on a table to create a personalized look.

## Range

We offer a comprehensive range of FurnitureLab™ graphics that cover many styles from simple geometric shapes to themes such as coffee and sports.

## Custom Designs

Anything you can design on the computer can be reproduced on a table top. On the following pages you'll see many ideas and examples of what we can do and what we have already done for other customers.

Our in-house design team is here to help with your design or to give you creative suggestions.

## Graphic Capabilities

Graphic table tops can be created with FurnitureLab™ or customer-supplied graphics

## FurnitureLab™ Graphics

We have an extensive library of design themes and styles that you can use. Simply select the design you like from p.86–117. You can have that design produced in one of our colors (p.147–149), or specify your own color choice.

## Color Choices

We can match a Pantone® color, a paint chip from companies like Benjamin Moore® or Sherwin Williams®, a laminate color from companies like Wilsonart® or Formica™, or we can match anything you send us.

# How Graphic Laminate is Produced

**1** Custom or standard graphics are designed on the computer and prepared for printing.

**2** The laminate design sheet is then printed out on a large-scale inkjet printer using special inks and paper.

**3** A sandwich is made of a clear plastic overlay, the printed design paper, and layers of craft paper intermixed with phenolic resin.

**4** This sandwich is placed in a press and subjected to high temperature and pressure, bonding the materials together to create a laminate sheet.

**5** The individual laminate pieces are cut out of the sheet.

**6** They are then glued to a particleboard core and the appropriate edge is applied, creating a finished table top.

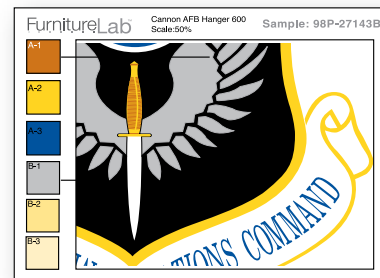

## All Graphics are Approved by the Customer Before Production

**1** First we email a PDF approval form so the customer can approve the size, color and placement of their graphic.

**2** Then we ship an actual laminate sample (shown right) which shows how graphics and colors will reproduce. Colors are shown with multiple options so that the customer can approve the one that is best.

## Don't Have Good Artwork?

We can rebuild your logo from a low-resolution JPEG into a reproduction-ready graphics file. If in doubt, just send us what you have!

## Technical Information

Acceptable file formats include:

- Adobe Illustrator CS5 or earlier
- Adobe PhotoShop CS5 or earlier

- Digital images should be formatted at the size they will appear on the table top (ex: 18x18") and their resolution should be at least 150 pixels per inch.
- We have an in-house Art Department that can help with all your technical needs. We can even rebuild artwork that does not meet these specifications.

For more information about Graphic Laminate please contact our sales team at [sales@furniturelab.com](mailto:sales@furniturelab.com)

# Logos

Putting a logo on a table is one of the easiest ways to make a lasting impression. Whether it's for a school, corporation, or restaurant, logo tables make a strong statement.

Tascosa High School: Amarillo, TX

There are many different strategies you can take:

- Place the logo in the center of the table
- Make it subtle by printing it lightly in a color that matches the background, letting it act like a watermark
- Turn your logo into a repeating pattern that covers the table

Produced with customer-supplied graphics

# Branding

A table can be a place to communicate your brand message. You can use the table as a tool to educate your consumers on the benefits of your products or your company. In either case, you will make a lasting impression.

Produced with customer-supplied graphics

Seattle's Best Coffee: Atlanta, GA

## Memorabilia

Create a memorable table with any artifacts you can find: photos, maps, or ticket stubs. Anything can become source material for this type of table.

Stephen F. Austin State University: Nacogdoches, TX

## Newspaper Clippings

Headlines and newspaper clippings can capture a moment in time and create a visually engaging table top. Simply supply us with the clippings you want to use and we'll do the rest.

# The Back Story

FurnitureLab™ got its start when artist Greg Rapp and his architect wife, Bryna, needed a kitchen table. They had just moved into their first apartment in San Francisco and had the idea to build their own. It was made with basic tools and was a bit rickety, but the couple thought, “If we could make this better, I bet we could sell these!”

In a short time, they converted their bedroom into a woodshop and Greg worked to hone his carpentry skills while Bryna tweaked the designs. Their range of products quickly grew and they started silk-screening their pieces with colorful Warhol-like images. They called their new business “Home on the Range” and began selling their work to galleries around the country.

Their big break came in the early 1990’s, shortly after they relocated to North Carolina. One of their customers opened a restaurant and asked them to make tabletops with pictures of her dogs. It was the couple’s first project of this scale and proved to be the pivotal point in their business. It occurred to them that this was a great commercial application of their process.

The next year they took their wares to Chicago for the National Restaurant Association trade show, one of the biggest in the country. They invited Bryna’s brother, Nathan, to help them with sales. The show turned out to be a big success! They had interest from customers of all kinds: restaurant owners, hotels, even Disney executives. They came back to North Carolina knowing that selling unique furniture to restaurants would be their niche.

Over the years, they have grown their product line and their business in response to needs expressed by their customers. By early 2000 their focus had shifted from the more whimsical furniture for restaurants and cafes to the Contract Furniture market and other institutional customers like colleges, hospitals, and the military. It was at this time that they changed their name to FurnitureLab™ to better reflect their new identity. Since then, their business has continued to flourish thanks to the hard work of their dedicated staff, their reps, and the trusting relationships they have developed with their dealers and customers.
