SOME (Section B) or all of the employees of Contractor and any subcontractor are covered employees. If this box is checked, I further certify that:

(1) Contractor has obtained all required criminal history record information regarding its covered employees. None of the covered employees has a disqualifying criminal history.

(2) If Contractor receives information that a covered employee subsequently has a reported criminal history, Contractor will immediately remove the covered employee from contract duties and notify the District in writing within 3 business days.

(3) Upon request, Contractor will provide the District with the name and any other requested information of covered employees so that the District may obtain criminal history record information on the covered employees.

(4) If the District objects to the assignment of a covered employee on the basis of the covered employee's criminal history record information, Contractor agrees to discontinue using that covered employee to provide services at the District.

## COMPANY BACKGROUND

Honeywell International is a Fortune 100 diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Honeywell's shares are traded on the New York, London, and Chicago Stock Exchanges. Headquartered in Morris Plains, New Jersey, Honeywell employs approximately ~131,000 employees in more than 1300 sites worldwide. We have an unrelenting focus on quality, delivery, value, and technology in everything we make and do.

### 130 Years of Innovation

Honeywell's story stretches back more than 130 years when an inventor named Albert Butz patented the furnace regulator and alarm. He formed the Butz Thermo-Electric Regulator Co., Minneapolis, on April 23, 1886, and a few weeks later invented a simple, yet ingenious device that he called the "damper flapper."

Our history encompasses several predecessor companies and the inspiring work of tens of thousands of people. But our core mission and values have been consistent from the start:

- Our vision for a secure, comfortable, more efficient future...
- Our steadfast belief in the power of innovation ...
- And our relentless insistence on continuous improvement.

From our genesis in 1885 to today, these are the principles that led us to the advancements and innovations of the past century and a quarter ... And they'll continue to inspire and guide us as we create new solutions for the challenges of tomorrow.

From simple service and maintenance to comprehensive design, installation and optimization of multiple systems, we can keep you performing at your best — no matter where you are in the world.

Look to HBS to provide world-class solutions for all facilities operational needs, including:

- ◆ Building Automation and Control
- ◆ Emergency Communications
- ◆ Fire and Life Safety Systems
- ◆ HVAC Install, Maintenance and Retrofit
- ◆ Integrated Energy Services
- ◆ Integrated Security Solutions

## HBS Main Lines of Business

- ◆ HBS is currently providing systems and solutions installation and maintenance services in the following segments:
  - ◆ **Mechanical Services** - This includes heating, ventilation and air conditioning systems that are designed to distribute conditioned air throughout a facility. Chillers, boilers, air handling equipment, control systems are typical of the kinds of systems that this service is designed to address. To optimize building efficiency and minimize cost, preventive maintenance is provided on equipment based on age, runtime and manufacturer's specification. By providing the right amount of preventive maintenance unexpected break down costs are avoided and equipment life is extended.
  - ◆ **Temperature Control Maintenance** - HBS provides support service for temperature control systems as part of a mechanical maintenance program or as a standalone offering. Maintenance service includes coverage of electric, electronic, pneumatic and direct digital control systems. With the advent of open systems architectures, HBS is able to maintain systems that were designed and installed by Honeywell as well as competitors' systems.
  - ◆ **Security and Fire Solutions** - HBS offers complete fire and security system design and installation. Fire alarm systems are designed by NICET trained engineers who are knowledgeable in state and local code requirements. Security systems include standard application; i.e. intrusion alarms, video, as well as card access to monitor access based on authorization. Honeywell also can offer an asset tracking strategy that will allow a plant or facility to monitor the movement of specific pieces of critical inventory as it travels from one department to another.
  - ◆ **Fire Alarm System Maintenance** - Fire alarm support services are provided by NICET trained Fire Alarm technicians. NICET trained technicians understand the critical communications link between field mounted devices, control panels located throughout your facility and in some cases the external link to the local fire department. They also understand state and local codes and the requirements that need to be met to maintain the integrity of your systems.
  - ◆ **Security System Maintenance** - This support service approach is designed to ensure that the security system that is in place to protect your employees and assets is working properly twenty four hours per day, seven days per week. Systems support includes card access, intrusion alarms, CCTV network and more.
  - ◆ **Building Automation** - Honeywell offers a comprehensive service program for building automation systems, as well. These systems are designed to control energy usage by ensuring that HVAC systems run only when required based on occupancy or other building requirements. Here again, Honeywell technicians are able to maintain not only systems manufactured by Honeywell but by competitors as well.
  - ◆ **Energy Solutions** - Honeywell will work with building owners/facility managers to develop the right strategy to conserve energy and reduce overall cost of operations. Energy Solutions will include the analysis of the mechanical HVAC systems, lighting systems, compressed air system and the approach that the facility is using to purchase gas/electricity.

- ◆ **Industrial Solutions** - HBS provides many of these services to large, industrial customers that have unique requirements. HBS can assist in monitoring and tracking emissions to help meet state and federal guidelines, and help reduce downtime and scrap by identifying issues in the production process with our line efficiency tracking system. HBS can automate and control the production process and reduce energy cost by analyzing how facilities operate, how compressed air is being used and how demand is affected by run time strategies.
- ◆ **Control Products** - Honeywell designs and manufactures products for the residential, commercial and OEM markets. These products are distributed by HBS as well as wholesalers, retailers, and original manufacturers and are used by contractors, homeowners and commercial buildings. These products are designed to provide comfort and the control of water, gas and the distribution or purification of air.

## Sustainable Design

- ◆ Honeywell is a proponent of environmental impact and energy initiatives as demonstrated through our presence in the U.S. Green Building Council, the nation's foremost coalition of leaders from across the building industry working to promote buildings that are environmentally responsible, profitable, and healthy places to live and work.

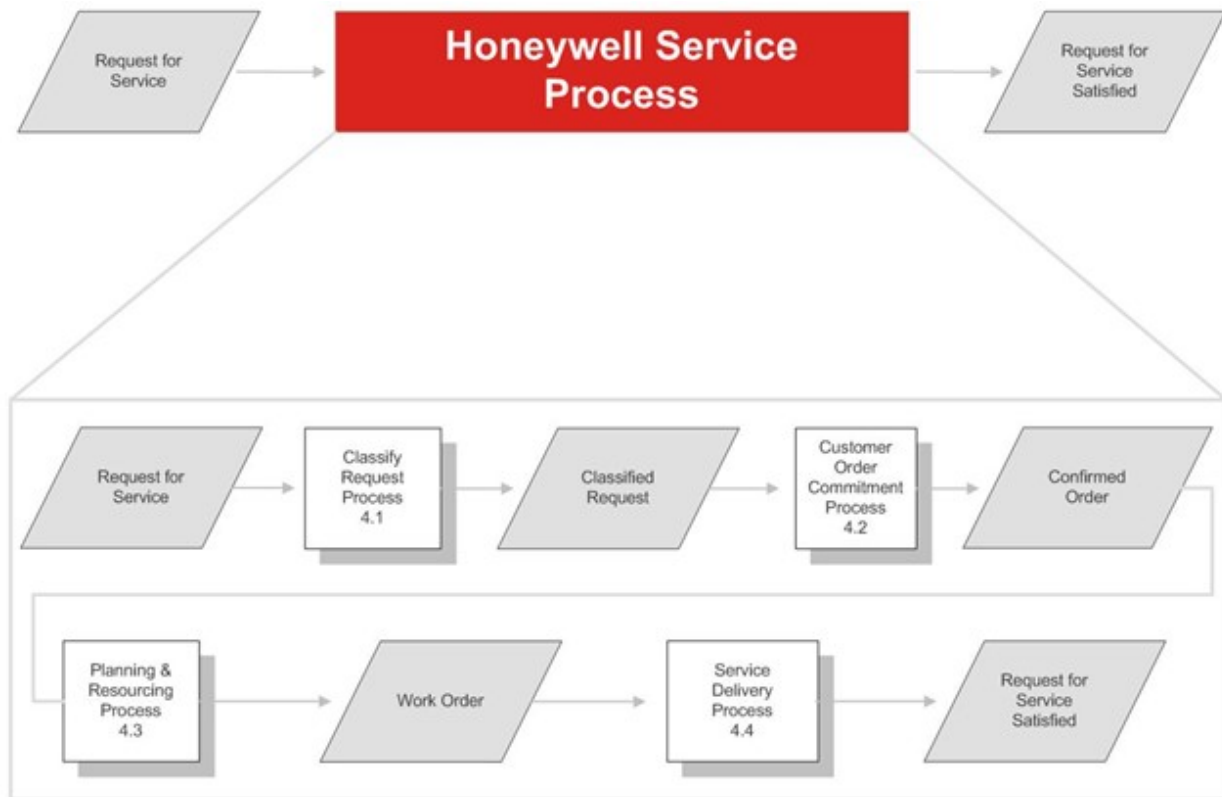

## Financial Capability of Honeywell

- ◆ Honeywell continues to perform well in a difficult environment, and prove we are a company that can be trusted to perform in good times and bad. Honeywell reached a financial performance threshold by surpassing \$39 billion dollars in 2016 annual sales. We are a diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services (35% of sales); control technologies for buildings, homes and industry (38% of sales); automotive products (13% of sales); and specialty materials (14% of sales).
- ◆ Honeywell is rated "A" by Standard and Poor's and "A2" by Moody's, classified by Wall Street analysts as "Investment Grade." Honeywell's ratings have been at these levels for many years. Honeywell remains well capitalized and has the financial strength to stand behind its guarantees. Our shares are traded on the New York Stock Exchange under the symbol HON, as well as on the London, Chicago and Pacific Stock Exchanges. Honeywell is also a component of the Standard & Poor's 500 Index. Our DUNS number is 13-969-1877.
- ◆ Federal Insurance Company has expressed its willingness to provide bonding support on single projects of \$150,000,000 with a total aggregate capacity of \$750,000,000. Our current bonding rate is 1% of the construction costs. Bonds for long term contracts will be issued on an annual basis, to be extended each year by a Continuation Certificate executed by Federal Insurance Company.

## OPERATIONAL PLAN – HVAC SERVICES

Honeywell’s Service Process is the critical framework for service delivery at all sites. This well established and proven process is supported by service-related assets and technologies that ensure consistent, reliable and high quality service. Since its launch over 18 years ago, our Service delivery continues to evolve with the introduction of system enhancements, new technologies and hardware upgrades. The flow chart in Figure I below represents a high-level view of Honeywell’s Service Process.

**Figure I – Honeywell Service Process**

Honeywell is able to modify discrete elements of our process to meet customers' business needs. Understanding and merging our process with customers' reporting requirements, as well as safety and environmental programs will lead to a common workflow for customers' and Honeywell.

## PREVENTATIVE MAINTENANCE PROGRAM PERFORMANCE MEASURES

### Preventative Maintenance (PM)

At Honeywell, the role of Preventative Maintenance is taken very seriously. Performing timely, comprehensive PM on a consistent, predetermined schedule, using competent trained technicians reduces demand service calls and results in cost savings for our clients. Furthermore, a customer can easily recognize and determine the value of PM when he/she builds a relationship and discusses PM activities with the technician.

### Preventative Maintenance Planning

Once the contract is signed, the PM planning process is relatively the same for both a multi-location account and single building customer. The PM hours based on estimates and plans are reviewed by the local Field Service Leader (FSL) who then determines skill set, geographic and technician availability.

Since Honeywell is committed to the completion of 100% of all PMs scheduled in a given month it is critical that the technicians assigned to perform the PMs are allotted enough time to complete all of their PMs as well as repairs, emergency service, repair work, small job installation, safety training and other labor requirements. **The average technician is available 1664 hours/year or 139 hours/month and for every hour of PM there is approximately one hour of repairs,** emergency service, repair work and small job installation labor. Armed with this knowledge, **Field Service Leaders (FSL) will seldom load an individual mechanic with more than 800 hrs/year of PM.** This methodology ensures that a technician has enough hours available in a given month to complete the assigned PMs as well as all other miscellaneous tasks.

Once the required hours, technician availability and skill sets are determined, one of two data specialists on the US labor loading team are advised of the maintenance contract data, monthly hours, tasking and technician names. The data specialists use the PM Rules Utility (PMRU) to construct the PM W.O. schedule as requested by the FSL. Once completed, the FX Service Management System automatically sends the PM W.O. via the web and the cell phone network, approximately 3 weeks before the month due, to the assigned technician's FAST tool.

The PM W.O. is then logged with an intended completion date and technicians, supervisors and managers are scored on the monthly and annual PM W.O. completion rates. The FX Service Management System assigns one PM W.O. per technician/ site / month.

Each PM W.O. has a unique tracking number, can be viewed in the Honeywell Service Online (HSO) website and is required to be completed by the last calendar day of the month scheduled.

### DEMAND SERVICE PROCESS

When a demand call (or email) is received from customer, the contact team at the GSRC confirms the request (e.g. emergency, expedite) and enters the call details in Honeywell's Computerized

Maintenance Management System (CMMS). The CMMS is Honeywell's central repository (database) for all service-related information.

## **Response Process**

After the data is logged, the GSRC focal person assigns the work order to a local technician and transmits the work details to the technician's FAST tool (smart device). On receipt of the data on the FAST tool, the technician is required to contact the GSRC by phone within 30 minutes to acknowledge and accept the call and provide an ETA to site. The GSRC then accesses the customers' 360 system and updates the work order with the Technician's ETA.

## **Arrival On Site**

Once the technician arrives on site, he selects "Arrive" on the FAST tool which logs the arrival time against the assigned work order in the CMMS. Details of the technician's work activities can then be viewed by customer via the Honeywell Service Online (HSO) website.

## **Call in Process**

Once on site, the technician proceeds to resolve the service issue. During this time, GSRC can access the CMMS system to monitor the status of the call and projected completion times.

## **Call Completion**

When the issue is resolved, the technician enters a list of materials, costs, labor hours, start and end time and a detailed description of the issue and resolution in his FAST tool. The technician also contacts the GSRC and communicates the work completed. The GSRC team enters the required data into customers' 360 system and closes out the call.

## **Customer Communication**

Once completed, a copy of the W.O. including the technician's entire work summary is uploaded to the Service Portal and can be emailed to JLL/Fidelity Investments from the FAST tool if requested. All customer stakeholders with approved access can view all service information pertaining to their locations for which they have responsibility.

With the Honeywell Online Service Portal™, customers will be able to securely submit non-emergency service requests online; view status of all service calls, whether scheduled, open or closed; view appointments and task detail of work performed on contracted service calls; and view contract and equipment coverage details (12 month history and includes only service performed per the Honeywell contract). Functionality enhancements or deletions are at the discretion of Honeywell.
