3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

**Required Federal contract provisions of Federal Regulations for Construction Contracts  
for contracts with TIPS OR TIPS MEMBERS**

The following provisions are required to be in place and agreed if the procurement is funded in any part with federal funds.

The TIPS OR TIPS MEMBERS is the subgrantee or Subrecipient by definition. The Rules are located in 2 CFR PART 200 - Appendix II to Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards at 2 CFR PART 200

In addition to other provisions required by the Federal agency or non-Federal entity, all contracts made by the non-Federal entity under the Federal award must contain provisions covering the following, as applicable.

**(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148).** When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to Federal Rule (D) above, when federal funds are expended by TIPS OR TIPS MEMBERS, during the term of an award for all contracts and subgrants for construction or repair, when Federal Funds are expended, by the TIPS OR TIPS MEMBERS resulting for this procurement process the vendor will be in compliance with all provisions listed or referenced therein.

**(E) Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708).** Where applicable, all contracts awarded by the non-Federal entity in excess of \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be

required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Pursuant to Federal Rule above, when federal funds are expended by TIPS or TIPS Members, the proposer certifies that during the term of an award by the TIPS OR TIPS MEMBERS resulting from this procurement process for construction contracts awarded by grantees and subgrantees the proposer agrees to be in compliance with all requirements listed or referenced therein.

Simon Roofing has the knowledge and experience within the commercial roofing industry to not only identify and resolve roofing problems but also develop service solutions that extend a roof's lifespan and reduce the amount of spending needed for proper roof maintenance. Simon Roofing uses a one-person crew on more than 90% of our Time and Material service calls to increase efficiency and ensure timely and accurate completion of service calls. Combined with the latest in GPS tracking and field access real-time technology, we have the capability to stay up to date on the latest developments with each and every service call and maximize technician productivity.

SR PreVision is focused on maximizing roof performance and longevity, while minimizing roof life cycle cost. Through objective inspections and evaluations, unique planning tools and superior service, SR PreVision can help you break the costly leak-repair reactive cycle and begin a proactive approach to roof maintenance. The SR PreVision process determines whether money spent on repairs for a roof will be effective, so you know for certain whether you should be spending budget dollars on repairs, restorations or replacement.

## TAKE THE GUESSWORK OUT OF ROOF LIFE EXPECTANCY

Determining roof life expectancy is the basis for all recommendations of an asset management program, so it's imperative that the calculations be reliable and accurate. Our proprietary approach to determining remaining useful life of a roof is distinctive in the industry. Unlike most companies that rely solely on visual inspections and infrared scans, SR PreVision also utilizes state-of-the-art testing of the roof membrane and scientific analysis, combined with results of our data analytic software (Simetrix) to determine remaining roof life expectancy.

Simon Roofing's ISO 9001:2015 Certified lab houses sophisticated equipment that performs a variety of membrane trace core sample tests. Newly renovated, our lab now allows for even more efficient workflow, improved capacity and faster turnaround. As part of SR PreVision, Simon Roofing performs a comprehensive roof inventory and inspection, including membrane testing, visual/infrared analysis and core sampling to:

- Reveal causes of leaks
- Identify repairs that can be made at the same time
- Evaluate warranties
- Determine cost effectiveness to repair/restore vs. replace
- Compare priority of roof in question to those in portfolio under similar conditions
- Custom online portal

## ROOF CONDITION SCORING

Roof condition reports show initial inventory and inspection results of the section. Each roof section will be graded based on Simon Roofing's purple, red, amber and green condition scores to set priority for maintenance, repair and roof replacement. Roofs rated purple are in poor or failing condition and are at the end of their serviceable life with one year or less remaining. These roofs should be budgeted for replacement. Roofs that are rated red are in poor condition, are near the end of service life and have a maximum of 3 years of service life remaining. Amber roofs are in fair condition and have approximately 4 to 6 years of service life remaining, with routine preventative maintenance. Roofs that are rated green are in good to excellent condition and have 7+ years of service life remaining, if properly maintained.

## RETHINK REPLACEMENTS

Traditionally, there have been only two solutions to nagging or persistent roof problems: perform ongoing patchwork repairs or make the costly investment of a complete roof replacement. Simon Roofing offers you re-roofing alternatives.

They can be completed at a fraction of the cost of a new roof; and because we believe in their value, they come equipped with their own warranty and leak-free protection.

Simon Roofing has created exclusive formulations within the Wite Brite™ line and products that work to restore your roof to an efficient state and extend its service life. Not only are these products at the cutting edge of roofing product development, but Wite Brite™ has also been nationally recognized as Plant Engineering Product of the Year.
