Roof Repair is an immediate long-term or short-term solution to a leak in the roof. Repair may include refurbishing damaged penetrations, equipment curbs, flashings, punctures and storm damage. In some cases, roof systems may require minor re-surfacing.

Restoration will make the entire roof significantly closer to its original condition and can greatly extend the life of the roof. Although this is considered a major repair of your roof system, it will normally cost about half as much as a full replacement. We consider ourselves experts in identifying the potential of restoration versus replacement and spend considerable time researching new materials and processes for these applications.

Replacement is needed when a roof system is damaged beyond repair. The need for total or partial replacement is usually caused by severe weather or the system simply reaching the end of its intended lifespan. The roof is replaced meeting strict code requirements.

Professional Analysis of your roof system can save money on major repairs in the future.

Specifications created by an experienced roofing company can reduce the risks associated with under-budgeting. This plan includes a description of your proposed customized roof system with a detailed cost analysis.

"What's Under Your Roof ? "

Multi-Layered Roofing Systems can conceal a variety of potential problems. An inspection of only the exterior roof layer may not provide a full picture of the condition of the roof.

Beware of poor roofing practices that promote simply covering-over wet materials. This practice will dramatically accelerate deterioration of fasteners and decking. Roofing over wet materials will inevitably cause more costly future repairs and potentially serious health hazards such as mold and decreased structural integrity. Because of our experience in the field and use of moisture scanning technology, we can accurately detect and develop a specific roof or repair plan for any facility.

System Types

MID ARK ROOFING can service many different Roof Types including:

Single Ply (TPO, PVC, EPDM), Modified Bitumen, Built-Up Gravel and Metal Roof Systems.

Roof Inspections

The National Roofing Contractors Association recommends having commercial roofs inspected at least twice per year and after every major storm. Early detection of potential problems should be the first goal of every building manager. Ask your Mid-Ark Representative to schedule your facility for a no obligation Bi-Annual Roof Analysis.
