

WHEN DO YOU KNOW YOU NEED ERC?

In today's environment, there is a focus on safe workplaces. But sometimes, the very workplace can contribute to environmental hazards, such as mold, asbestos, lead or even hazardous vapors. Do you have associates who miss work or complain from potential environmental illnesses? Apparent ceiling leaks can point to mold. Buildings may have been built using asbestos or lead based paint. **ERC**, a Professional Firm in Environmental Services, can help.

Since 1991, we have worked with many clients, offering a cost effective solution to their pressing environmental concerns. The quality of our work brings many clients back to us, and we currently have an awarded multi-year government contract with Choice Partners (CP) to provide the following services.
