RED HAWK
A UTC Fire & Security Company

ANALYZE · DESIGN · PROTECT · SUCCEED

Red Hawk is a national provider of electronic security and fire detection products and services and serves many customers nationwide. However, aside from electronic security and fire detection systems, we are part of a much larger building systems family of companies. As part of United Technologies Corporation (UTC) the following building systems companies serve developers and projects:

Carrier is the world's largest provider of air-conditioning, heating and refrigeration solutions.
http://www.corp.carrier.com

Otis is the world's leading manufacturer, installer and maintainer of elevators, escalators and moving walkways
http://www.otisworldwide.com

UTC Power is a full-service provider of environmentally advanced power solutions.
http://www.utcpower.com

Onity is a leading global provider of electronic locks to the Hospitality & Educational marketplace
http://www.onity.com

Red Hawk is a leading provider of integrated electronic and physical security solutions across the United States

Red Hawk's charge as a value added partner is to provide our customers with a wide variety of choices when it comes to the capability of equipment we suggest as the consulting Professionals. Taking specific consideration of each and every application we become involved with; one of the most important values we can bring to any undertaking is the consideration of technology vs. price point. With this consideration in the fore-front, our motivation is to bring you the best value, coupled with the highest technology available in order for you to minimize your capital outlay and maximize the highest technology available today. We help our customer base accomplish this by giving them indirect access to our vast purchasing agreements through some of the nation's largest and well respected security manufacturers'. Having access to this purchasing power, we are constantly evaluating and researching the finest technology these manufacturers have to offer, as well as negotiating the best price for our customers'.

Red Hawk provides the following security and network solutions:

INTEGRATED SYSTEMS
We believe security should be top-notch and affordable. That is why we recommend nonproprietary-based systems that deliver quality service at a lower rate and offer the flexibility of using more than one vendor. Our approach provides you with a wider range of equipment and price ranges for video, access control, security monitoring, and alarms.

ACCESS CONTROL
Card access, or access systems, employ cards and readers to secure your facilities. Access Control systems can be deployed across multiple sites to ensure your road staff always has access. In times of an emergency, Access Control systems can help you determine who is still present in your building.

ALARM SYSTEMS
Alarm systems, also known as burglar or intrusion alarms, are an effective first line of defense for your business when staff is not present. Relying on Red Hawk means you can rest assured that your system will work 24/7.

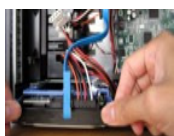

VIDEO SURVEILLANCE AND MONITORING
From a single camera to fully networked, multi-location surveillance systems, we provide flexible, powerful CCTV solutions, bringing together high quality, crisp images with advanced storage, retrieval and networking. We offer services from video verification to interactive video with two-way voice communication.

DIGITAL RECORDING
Digital recording offers innovative alternatives to more traditional means of video data storage. Using digital channels enables higher quality video, easier access to video data, and more comprehensive archiving and storage.

INSTALLATION SERVICES AND PROJECT MANAGEMENT
Advising you about the right products for your needs involves our expertise as well as your input. We work with you to co-develop programs that integrate multiple sites or systems to lower support costs. Our experts are fully prepared to handle the design and details for any deadline and budget

STRUCTURED CABLING
Structured cabling is the foundation of all communication network installations. Red Hawk is one of the most respected in the nation when it comes to installing your network infrastructure. Our goal is to provide you not only with a reliable system, but also one that takes full advantage of today's technologies as well as future technologies.

DATA CENTER SERVICES
Red Hawk is a leading provider of the exact cabling, cage, rack, power management, DC power, and grounding technologies and services that Telecommunications and Data Centers demand, from design analysis to end-to-end solution.

NETWORK DESIGN
In today's information driven world, the design and installation of your network infrastructure is one the most important investment decisions you can make.

GENERAL BANK EQUIPMENT
Red Hawk specializes in sales and service of only the highest quality safe-deposit boxes, cash drawers, under counter equipment and lockers, so you're guaranteed peace of mind and a breadth of resources.

SAFES, VAULTS, LOCKS
Safes, vaults, door locks, safe locks, and safe-deposit boxes...no matter what the safety measure, Red Hawk has the products and the professional advice to meet your requirements. We carry a full line of safes and vaults from the world's leading vendors.

AUTOMATED TELLER MACHINES
Red Hawk has the proficiency to service every aspect of ATMs, including cash balance, first and second-line maintenance. From clearing paper jams to repairing components and system failures, to removing and replacing cash on an as-needed basis, we do it all under one roof to reduce purchasing and support costs.

FIRE ALARM SYSTEMS
We are experienced in helping our clients with the design and installation of fire alarm systems, with components including pull stations, smoke and heat detectors, bells, horns, strobe light and audio-visual combination units designed for specific applications.

As you as you can see, we bring a lot of building systems to the table and we would like to visit with you and your development team early in the project's design phase to better understand the opportunity and to see how our companies could best serve your needs on this as well as future projects.

RED HAWK
A UTC Fire & Security Company

5690 DTC Blvd., Suite 100 • Greenwood Village, CO 80111 • Ph: 303.779.6272 • Fax: 303.779.6443

Profile

A global leader in fire safety and security, UTC Fire & Security (UTCFS), with its related entities, delivers peace of mind to individuals and businesses throughout the world.

In fire safety, UTCFS is comprised of a diverse portfolio of businesses, including residential and commercial portable fire extinguishers, detection & alarm, suppression, fire fighting equipment, specialty detection and combustion control.

In electronic security, our companies provide systems integration, installation and service of intruder alarms, access control systems, digital video surveillance and recording devices. The companies also provide cash in transit, monitoring, response and security personnel services.

UTCFS companies serve a variety of customer segments including education; entertainment; financial services, government, healthcare, hospitality, petrochemical oil and gas, retail, telecommunications, and utilities, marine and many others.

Revenues

$5.8 billion (2007)

Employment

Approximately 47,000 employees working in more than 35 countries.

History

United Technologies Corporation (UTC) entered the fire and security segment in July 2003 with the acquisition of Chubb. In April 2005, UTC acquired Kidde Plc. and joined it with Chubb, forming UTC Fire & Security, the number two player in the fire safety industry globally. In May 2005 Lenel Systems International was added. In 2007 UTCFS grew through several strategic transactions, including the acquisition of Initial Electronics, Marioff, and others as well as investments in key geographies in China, India and the Middle East.

Brands

UTC Fire & Security companies provide products and services under a number of brand names, primarily Chubb, Kidde and Lenel. UTC Fire & Security has a large portfolio of brands including well known names such as Angus, Autronica, Chemetron, Detronics, Onity, Fenwal, Marioff, Red Hawk, SICLI and many others.

Prestigious installations

Some of the most discriminating customers around the world rely on UTC Fire & Security products and services to protect their assets, including the Eiffel Tower in Paris, the historic Waldorf Astoria hotel, 7 World Trade Center and Statue of Liberty in New York City. Other reputable customers include the Westminster Abbey in London, Beijing Olympic in China.

Parent Company

United Technologies Corporation (UTC), based in Hartford, CT USA, is a diversified company with a long history of pioneering innovation in the building and aerospace industries. Products include Carrier heating and air conditioning systems, Hamilton Sundstrand aerospace systems and industrial products, Otis elevators and escalators, Pratt & Whitney aircraft engines, Sikorsky helicopters, UTC Fire & Security systems and UTC Power fuel cells. (NYSE: UTX). In 2007, UTC was rated the most Shareholder Friendly company in the aerospace and defense electronics sector by Institutional Investor magazine.
