## **Overview**

*TEAL's unique concept of "central plants as-a-service" has led to the development of innovative, sustainable, vertically-integrated managed central plant solutions that clients never need to own, maintain, or operate themselves. Combining cloud computing and 24/7 remote monitoring technology, TEAL delivers three solutions - the TEAL System, TEAL Aquatherm, TEAL iPlant - to provide hot water, hydronic heat, chilled water, or any combination of the three.*

*TEAL's environmentally friendly systems deliver dramatic energy savings, lower life cycle costs and unique financial results compared to traditional HVAC & DHW systems. Additionally, our state-of-the-art technology uses data-driven machine learning algorithms for virtual supervision to ensure ZERO downtime 24 hours a day, 365 days a year.*
