Overview

Projectmates is an all-in-one construction management software platform built from the Owners perspective. The software gives Owners complete visibility into the status of every project in their program. Within Projectmates, many process flows can be automated. Approvals, RFIs, submittals, punchlists, and bidding can all be configured to match the structure of any team. With the Projectmates mobile app, field teams can easily collaborate on drawings and other design docs right from the job site. The software also gives CIP managers a convenient way to manage and rank project requests, allocate funds to awarded projects, and track the status of those funds over the course of their CIP. Projectmates has it all.
