Overview

Connected Cities Integrators (or CCI) works with cities, counties, universities, school districts, and other public agencies to help them design, develop, finance, and implement a variety of infrastructure improvements. In general, CCI's solutions are custom designed for each client to help them improve security, public safety, quality of life, energy efficiency, and revenue enhancement. CCI has strong relationships with various lenders and private equity firms to help pay for these infrastructure improvements when the client's current funding levels are insufficient and/or when the client has been denied previous funding requests.
