Overview

RWH Energy is a Service-Disabled Veteran Owned Small Business created to provide our clients energy saving solutions to meet and exceed their energy goals. RWH is owned and managed by military veterans; each having served multiple combat tours around the globe. The honor, pride and commitment we provided in service to our country are now the corner stones of our business. We have established a proven, turn-key approach to provide significant energy reductions and overall cost savings. We assist our clients in achieving their energy goals by measuring their overall facilities' utility consumption, designing an energy plan, implementing Energy Conservation Measures (ECMs) and guaranteeing energy savings. RWH also offers finance solutions to fund energy projects and eliminate the need for any up-front capital. The payments are structured below the energy savings effectively providing zero impact to the operational budget. In many cases we structure an immediate increase in cash flows as well. Our project approach begins with understanding the needs of our clients. After we have discussed project goals and objectives RWH will conduct an initial site visit. This inspection will identify possible Energy Conservation Measures (ECMs) and allow us the opportunity to gather enough information to provide a Preliminary Assessment (PA) report. Once the PA is presented and ECMs are agreed upon, we will conduct a more thorough Investment Grade Audit (IGA). Upon acceptance of the IGA, RWH will secure financing for the project and enter into the Engineering, Procurement and Construction (EPC) phase. Upon completion of the EPC, the project is certified through Measurement & Verification (M&V) and commissioned. RWH can also provide Operations and Maintenance (O&M) options if requested.
