Overview

International Dyslexia Learning (IDL) provides specialist multi-sensory software to schools in the UK and around the world. Our main goal is to provide learning support to those most in need and our software is used by thousands of learners across the globe.

IDL was developed to support the growing number of young people who are falling through the gaps in Literacy and Numeracy. IDL Literacy dramatically increases reading and spelling ages for those with dyslexia or low-literacy ability. In addition, research has shown it also has a hugely positive impact on the confidence and self-esteem of those using the programme.

IDL Numeracy has been designed for children with dyscalculia, those struggling with Math or who are experiencing math anxiety. It includes a fully graded course with interactive activities to support pupils and help them progress.

Our new IDL Wellbeing programme has been developed to support pupils aged 7-13 to build the skills needed to achieve and maintain good mental wellbeing such as emotional awareness and mindfulness.
