Overview

SchoolBlocks is the only solution built on top of Google Suite (GAFE) and Office 365. Our solution is your best option since it fits into your technology landscape as if it was invented with that in mind. Our 25 years of experience, incredible implementation and ongoing support will redefine your expectations of all vendors with whom you engage.

Some key factors make SchoolBlocks the best:

Factor 1: Google Suite and Office 365: Google and O365 offers a calendar, file storage (Google Drive, OneDrive), and user management system for free that's better than any other solution in the world. SchoolBlocks integrates with these solutions to ensure you are using best-in-class now and into the future.

Factor 2: Mobile: Over 55% of visitors use a mobile device to access websites. "Responsive" design is not enough, so we've taken it to the next most current option of giving every client a free web app. Our download rates exceed any other iOS or Android App for many reasons. No need to go to the App store to get it! You can even have one for each school.

Factor 3: Partnered with BrightArrow for SIS integrated emergency notifications. BrightArrow also has a PowerSchool plugin.

Factor 4: ADA Compliance and the lack of templates: Templates may be ADA compliant and visually impressive. However they age and become less compliant over time. SchoolBlocks employs a non-template methodology that's sure to stay on-top of ADA compliance.

SchoolBlocks is the culmination of lessons learned from over a decade of building school district website solutions. There is no other product that merges today's technology ecosystem with a school district's needs as gracefully as SchoolBlocks. SchoolBlocks is your district's modern, economical website solution.
