Overview

Thank you for allowing Safe Air UV to serve your facility's Safety, Savings, and Confidence goals. We are committed to listening to your needs and those of your stakeholders. We are committed to communicating with fast and accurate information, and that our "yes" means "yes."

As one of the only full service UV suppliers in the world, we have numerous options for a wide variety of client needs. We offer turn key in-duct UV systems for facility-wide protection, Upper-room UV protection for high risk zones, and portable disinfection for targeted unoccupied spaces. All of our products are made in America, and have been since 1963. As a direct manufacturer's rep, you can count on great pricing with measurable, science based air and surface disinfection.

One size does not fit all and we are committed to using industry standards and decades of research to accurately specify your project according to your goals. You will receive reliable and specific pathogen reduction expectations for your applications - not generic numbers like "99.9%" that cannot be quantified or only work in the test chamber.

Safety features always come standard such as motion detection, door access safety interlock switches, and view ports where applicable. We are also one of the only companies to offer 100% non-proprietary UV lamps made by Philips so you will never be handcuffed to us for expensive house-brand UV bulbs. With this feature alone, we almost always not only win bids, but blow competition out of the water in "apples to apples" comparisons and long term cost of ownership.

In addition to Pathogen Remediation, UV can help your facility save thousands of dollars in energy and maintenance costs when installed in the HVAC system. In-room UV increases your "Clean Air Delivery Rate" and equivalent "Air Changes per Hour" values and could help reduce other expenditures like outside ventilation schedules and high MERV filter budgets.

communication to your stakeholders will help their perception and can improve attendance, referrals, retention, and recruitment. To help you best take advantage of these "soft" HR / PR benefits, we gladly provide free communication material, door / window stickers, and facility signage if desired.

Thanks again for considering Safe Air UV. We are confident you will be glad you decided to work with us.
