### **Overview**

*Infinit-I Workforce Solutions provides an online learning management system with access to a library of training videos to promote safety and help the transportation industry meet FMCSA regulations. Our training program is backed by more than 20 years of experience in the industry and the short 5-7-minute videos available in the library were created to promote employee comprehension and retention. The Infinit-I system is available online so employees can access their training anywhere, on any device with an internet connection. This makes training simpler for all involved so safety supervisors can ensure everyone has access to the information they need for a safer workplace. On top of the diverse library, clients using the Infinit-I system have access to a dedicated client success team available to answer questions, help set up training modules, and walk them through any tracking and reporting needs. The Infinit-I team is dedicated to the success of our clients when it comes to implementing an effective training program. Set up onboarding, ongoing, and corrective action training using the Infinit-I library available or upload custom training content. Make use of the custom content to share news or other communications to make this information readily available to all employees immediately. Keep up with all certification and other training documentation in one place with the Infinit-I system. Date and timestamped documentation ensures you have all you need to prove your safety records.*
