Overview

Company and/or Product Description:

This information will appear on the TIPS website in the company profile section, if awarded a TIPS contract. (Limit 750 characters.)

Commercial Risk Services is a professional enterprise risk management, emergency management and loss control consulting firm that was formed in the year 2001. We have locations in Tulsa, OK, Dallas, TX and Houston, TX. Although we have only been in business for relatively short period of time, we have over 100 years of combined risk management and emergency management experience. Over the course of the last twenty years we have developed an extremely loyal customer base throughout the states of Texas, Oklahoma, Missouri, Kansas and Arkansas. We have a broad range of technical expertise and successful history in the fields of risk and emergency management among several different types of operations, from School Districts and Municipalities to Manufacturing and Industry to Nursing Homes and Churches. Our primary point of focus is currently public entities and we are able to bring unique risk identification, treatment and control techniques, based on our broad experience base, to truly create significant impacts on total cost of risk reduction. Additionally, we bring a full suite of emergency management consulting services to our customers. Our approach to service is based on a labor-intensive, "in-the-trenches", type of work ethic. We feel that our success as a member of your team, is more reliant on helping your employees (our fellow team members) accomplish our shared goals, than it is to merely assign written recommendations and compulsory tasks alone. Simply put, we are performance based and we are about results. As implied in our contract, our standards are strict and absolute. Our job is to continue to be a productive part of your team. The bottom line is that, we strive to customize our services and solutions to meet your individual needs at all times.
