2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and / or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

2 CFR PART 200 Contract Provisions

**Required Federal contract provisions of Federal Regulations for Construction Contracts
for contracts with TIPS OR TIPS MEMBERS**

The following provisions are required to be in place and agreed if the procurement is funded in any part with federal funds.

The TIPS OR TIPS MEMBERS is the subgrantee or Subrecipient by definition. The Rules are located in 2 CFR PART 200 - Appendix II to Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards at 2 CFR PART 200

In addition to other provisions required by the Federal agency or non-Federal entity, all contracts made by the non-Federal entity under the Federal award must contain provisions covering the following, as applicable.

(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to Federal Rule (D) above, when federal funds are expended by TIPS OR TIPS MEMBERS, during the term of an award for all contracts and subgrants for construction or repair, when Federal Funds are expended, by the TIPS OR TIPS MEMBERS resulting for this procurement process the vendor will be in compliance with all provisions listed or referenced therein.

(E) Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-Federal entity in excess of \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be

2 CFR PART 200 Contract Provisions

required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Pursuant to Federal Rule above, when federal funds are expended by TIPS or TIPS Members, the proposer certifies that during the term of an award by the TIPS OR TIPS MEMBERS resulting from this procurement process for construction contracts awarded by grantees and subgrantees the proposer agrees to be in compliance with all requirements listed or referenced therein.

Seller at its option will either repair or replace with a comparable product within commercially acceptable standards any product which fails under normal and reasonable use for which the product is intended, provided such failure and written notification of such failure to Seller occurs within the applicable time period set forth above and that Buyer has paid the full project price. Alternatively, Seller may refund the purchase price paid for the returned defective product. Damage or repairs arising from abuse, accident, vandalism, improper installation, or alteration of the product subsequent to sale, shall not be considered to be a defect in material or workmanship. Notwithstanding anything to the contrary herein, this warranty shall include materials and freight for the applicable time period set forth above except Seller shall also pay for labor during the first two years of the warranty period.

THIS WARRANTY SHALL BE IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE OBLIGATION OF ANY SURETY SUPPORTING THIS WARRANTY CEASES ONE YEAR FROM THE DATE OF SHIPMENT.

Buyer's sole and exclusive remedy against Seller shall be for the repair or replacement of defective parts as provided herein and no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available to Buyer. The sole purpose of this exclusive remedy shall be to provide Buyer with free repair and replacement of defective parts in the manner provided herein. This exclusive remedy shall not be deemed to have failed in its essential purpose so long as Seller is willing and able to repair, replace or refund the defective parts in the prescribed manner.

Buyer is responsible for regular maintenance of the products. "Regular maintenance" includes tightening of any loose assembly and attaching hardware, replacement of damaged components, cleaning of upholstery and other finishes, inspection of product components (including assembly hardware, moving parts and anchoring devices) and removal of dirt on any powder-coated steel, especially on attaching footplate. This work shall be performed at reasonable intervals based on frequency of use, but at least every six (6) months. Strenuous use requires weekly inspection. All hazards are to be corrected prior to further use.

Seller's entire warranty is embodied in this writing, irrespective of any statements made by Seller's salesmen, employees, or agents about Seller's products. Any such statements do not constitute warranties, shall not be relied upon by Buyer, and are not part of this warranty. This writing is a complete and exclusive statement of the terms of Seller's warranty and may not be modified, altered, or amended except in writing and signed by an officer of Seller.

PRODUCT PRICING

ALL PRICES LISTED IN KI PRICE LISTS ARE FREIGHT EXCLUDED OR DELIVERED PRICING.

KI price lists and any prices contained therein are subject to change without notice. Prices applicable to all Customer orders shall be those in effect at the time KI receives a complete order from Customer unless: Customer and KI have in place a written special pricing or master supply agreement, which agreement specifies the prices to be paid by Customer; or Customer requests a product shipping date to occur more than one hundred twenty (120) days after KI's receipt of Customer's order (in which case KI shall have the option to apply to Customer's order the price list in effect as of Customer's requested shipping date). The most current KI price lists are maintained electronically and can be found at www.ki.com/pricelists

Any discounts are ineffective if, as a result of the discounts, the final selling price of any product offered in a KI quote would be lower than the corresponding price for that product under KI's multiple award schedule contracts with the United States General Services Administration (GSA). If the final selling price for any KI product in a quote would be below KI's price to GSA, KI will offer that product at the same price that KI offers to GSA. No other terms or conditions of KI's GSA contracts would apply to such sales.

FREIGHT AND DELIVERY

Freight Terms

KI reserves the right to select the "best way" shipment methods and means (including, but not limited to, determination of the carrier, method of shipment, and routing). Standard delivery shall be dock-to-dock delivery and shall occur Monday through Friday, 7:00 a.m. to 3:00 p.m. for truckload or 9:00a.m. to 5:00 p.m. for less than truckload or parcel. Products quoted as "Delivered Pricing" shall be "F.O.B. Origin," and freight charges are based on shipments to the 48 U.S. contiguous states. For shipments destined to other U.S. states or foreign territories, delivery will be made to a prearranged port. Customer shall prepay all freight charges and any extra expenses resulting from any request by Customer for after-hours, holiday, weekend, or specific time delivery, or special carrier, shipping method, (e.g. air freight, exclusive use vehicle) packaging, and/or routing. Contact KI for quote.

Requests for Specific Delivery Time(s)

KI considers requests for delivery times and for drop shipments to job sites, and will undertake reasonable efforts to indicate any such request(s) to product carriers. KI may, in its sole discretion, extend to Customer the option of a carrier-guaranteed set delivery time at an additional cost to Customer. KI's liability for any damages incurred for any late deliveries, including labor and other expenses resulting from any such delays, shall be limited to a refund of the charge for the aforementioned guaranteed set delivery time.

Accessorial Fees

Customer shall be responsible for the payment of all accessorial fees, including, but not limited to, charges necessitated by any of the following:

1. A need for special delivery equipment, including lift gates
2. Inside delivery
3. The absence of a loading dock
4. Redirection or re-consignment of product
5. Detention charges
6. Street unloads
7. Improper refusal of product

Storage of Product

If, following KI's acknowledgement of Customer's purchase order, Customer requests a delay in shipment for any period greater than one (1) day from the scheduled ship date, Customer shall be responsible for the payment of the following storage fees:

1. Orders less than a full trailer (11 pallets or 24 feet or less): \$5.00 per day per pallet.
2. Full trailer: \$60.00 per day per trailer.

Any long-term storage (i.e. storage outside standard shipping and installation storage) must be climate controlled. Temperature must range between 60 and 80 degrees Fahrenheit and humidity must be controlled between 45 and 65 percent relative humidity.

Split Deliveries

Orders can be split shipped (including C.O.M. as it arrives) only with faxed or written authorization.

Re-delivery of Freight

When re-delivery of merchandise is required because the customer is not ready to accept merchandise, and no notification of this fact is given to the factory at least one week prior to the scheduled ship date, the actual costs for freight, restocking and re-handling, plus 5% of the order value, will be billed to the customer. CAUTION: After obtaining a clear receipt for shipment, the delivering carrier is no longer responsible for damage or shortages.

PAYMENT TERMS

Net Thirty Days

Payment on all KI invoices shall be made in U.S. dollars within thirty (30) days of the date of each such invoice and without offset, back charges, retention, or withholding of any kind. Unpaid and delinquent invoices shall accrue interest at the rate of one and one-half percent (1.5%) per month, or the highest rate permitted by law, whichever is less.

Leasing Provisions

KI offers a lease finance option. The first and last monthly payments are required at the time of signing. Lease quotations subject to National Cooperative Leasing credit approval. Rates are based upon current market and subject to change without notice. Contact KI for a quote.

Collection Costs

In the event Customer defaults on Customer's payment obligations to KI, and KI employs the

TITLE, RISK OF LOSS, AND DAMAGE OR SHORTAGE CLAIMS

Title and Risk of Loss

Title to product shall pass to Customer upon delivery by KI to the carrier. For purposes of risk of loss, all shipments are "F.O.B. Origin"; and Customer acknowledges that, once KI delivers the product to the carrier, risk of loss shall pass to Customer. If you receive product that is damaged, the following steps must be taken:

1. Before signing for the merchandise, make careful notation of package conditions and describe any type of damage observed on the carrier's delivery receipt.
2. If the delivery receipt has been signed free and clear and damage is discovered after carrier has left, the customer shall report the concealed damage and request an inspection to the local carrier terminal within five business days of receipt date.
3. Retain all shipping cartons for inspection by the carrier agent.

Shipment Damage Claims

All products are packaged to comply with carrier requirements and leave KI's manufacturing facilities in good condition. Customer shall be responsible to carefully inspect all products upon delivery and before acceptance. Any damage discovered upon delivery must be noted on the bill of lading. Notification of damage discovered after delivery must be given to the carrier within five business days, immediately following delivery, and all damaged product must be kept at the point of delivery in its original packaging. KI shall not be liable for loss or damage to product that occurs in transit, and Customer's sole remedy for any such damages shall be to seek appropriate recourse against the carrier. For more information visit <http://damagedproductprocess.com>

Shortage Claims

Customer must report shortage claims to KI within ten (10) days immediately following delivery. Shortage claims reported after ten (10) days after delivery will not be honored.

Returns

Product conforming to the specifications contained in KI's acknowledgement to Customer may not be returned to KI without KI's written consent, which consent may be conditioned upon Customer's agreement to pay re-handling and/or restocking charges and/or to prepay all freight charges on the return shipment.

CODE & FLAMMABILITY STANDARDS COMPLIANCE

Seating

1. California Technical Bulletin 117. All seating products manufactured by KI meet or exceed the standards set forth in California Technical Bulletin 117 and are labeled accordingly.
2. California Technical Bulletin 133. KI offers numerous products that can be manufactured to meet the flammability requirements set forth in California Technical Bulletin 133. For products to meet the requirements of the open-flame test, changes in materials are made. Restrictions are placed on fabric selections and product type. When ordering product to comply with California Technical Bulletin 133, the "FR" option must be selected in the model number string. Please see individual sections in the price list for additional cost and leadtimes, which vary between products.

Panels

ASTM E84 (equivalent to UL 723 and National Fire Protection Association NFPA 255) is the test method used to determine the Flame Spread and Smoke Developed Indices of the system, consisting of the core substrate, fabric covering, and adhesive. NFPA 101, for Life Safety Code, defines acceptable Flame Spread and Smoke Developed Indices that have been adopted by the federal and many state or local governments as law in the form of building codes and regulations. Panel cores have been judged acceptable for the use with UL Recognized Component Office Panel Fabrics. Contact KI for the current list of fabrics that are acceptable for use.

Style and Fabric Availability

Many styles can be manufactured to comply with TB133, depending on the fabric content of a selected upholstery textile. When considering C.O.M. fabrics, submit the material attached to its composition description card to KI for approval. *Certain C.O.M. materials may require a sample burn test for certification. A sample product will be built with C.O.M. material and tested. The cost of testing must be added to the cost of a test sample including appropriate upcharges to receive certification.

Pricing

TB133 requires special construction procedures, and an upcharge applies to each product ordered as such.

General Information

Specifications, test procedures and requirements pertaining to flammability regulations can change. KI will make every effort to keep our information and services pertaining to flame specifications up-to-date. However, we reserve the right to alter the products, fabrics/leathers, or upcharges associated with any of the above or any other flame specifications.

MISCELLANEOUS Weights and Dimensions

All weights and dimensions listed in KI's price or product listings are approximate.

Statute of Limitations

Except as specifically set forth in these Terms, Conditions, Rights and Warranties, no claim arising out of or in connection with products purchased from KI, these Terms, Conditions, Rights and Warranties or any product warranty applicable to any KI product may be brought by Customer more than one (1) year after the cause of action on which it is based has accrued.

Jurisdiction and Venue

The interpretation and application of these Terms, Conditions, Rights and Warranties and any product warranties applicable to products purchased by Customer from KI shall be governed in all respects by the laws of the State of Wisconsin, U.S.A., without reference to the rules of any jurisdiction concerning conflicts of laws or the provisions of the United Nations Convention on Contracts for the International Sale of Goods. Customer agrees that all disputes arising from the interpretation or application of these Terms, Conditions, Rights and Warranties or any product warranty shall be subject to the exclusive jurisdiction of and venue in the federal and state courts located in Green Bay, Wisconsin, or within Brown County, Wisconsin, U.S.A.; and Customer hereby consents to the personal and exclusive jurisdiction and venue of these courts.

In the event of delay in performance due to any such cause, KI reserves the right to extend the date of delivery or time for completion by a period of time reasonably necessary to overcome the effect of such delay, to allocate any available supply of goods in a manner it deems reasonable, or to cancel any purchase order.

RIGHTS AND WARRANTIES

The following KI product warranty applies to products manufactured on or after July 18, 2016 and manufactured and/or distributed from a KI manufacturing site. This warranty is given to the initial purchaser and is valid for as long as the initial purchaser owns the product. The warranty, which runs from the date of manufacture, covers defects in materials and craftsmanship found during normal usage of the products during the warranty period. If a product is defective, and if written notice of the defect is given to KI within the applicable warranty period, KI at its option will either repair or replace the defective product with a comparable component or product, or provide a refund of the purchase price. KI reserves the right to determine labor method used during replacement of product. The Lifetime Warranty applies regardless of the number of shifts the product is used each day, unless specified as an exception. All non-lifetime product warranties are a single 8 hour shift per day unless otherwise noted. KI products are not intended or warranted for outdoor use unless specifically stated for outdoor use.

EXCLUSIONS

This warranty does not cover:

- Failure resulting from normal wear and tear which is to be expected over the course of ownership.
- Any misuse, abuse or modification of the original product voids the warranty.
- Damage caused by carrier.
- Products that are exposed to extreme environmental conditions or that have been subject to improper storage.
- Alterations to product not expressly authorized by KI, nor to products considered to be of a consumable nature such as bulbs, light ballasts, and surge suppression products.

- Natural variations in wood grain; changes in surface finishes, including colorfastness, due to aging or exposure to light; matching of color, grain or texture, except to within commercially acceptable standards.
- Replacement parts are covered for two years or the balance of the original warranty, whichever is longer.
- Failure to apply, install, reconfigure, or maintain products according to published KI planning, assembly, or user guides.

NOTATIONS

- Non-Standard Product has a one year warranty, unless the change is only cosmetic. If the product is non-standard due to a cosmetic change, the warranty is the same as the "base" product.
- Third Party Supplied Product (KI shall pass along any warranty it receives with respect to other manufacturer's products).
- Modification to U.L. Listed products eliminates the listing.
- KI reserves the right to request that the damaged product be returned for inspection prior to granting a remedy.
- KI will not be liable for consequential, economic (including loss of time or inconvenience), or incidental damages arising from any product defect.
- International Warranties may differ.

EXCEPT AS STATED ABOVE, KI MAKES NO EXPRESS OR IMPLIED WARRANTIES AS TO ANY PRODUCT AND IN PARTICULAR MAKES NO WARRANTY OF FITNESS FOR ANY PARTICULAR USE. AT KI'S OPTION, PRODUCT REPAIR, REPLACEMENT, OR REFUND OF PURCHASE PRICE IS THE CUSTOMER'S EXCLUSIVE REMEDY FOR ANY AND ALL PRODUCT DEFECTS.

SOLO WORKSURFACES

Our modular worksurfaces bring value and flexibility to the lecture hall environment. Solo is available with swing-arm chairs or as stand alone worksurfaces to be used with owner specified seating.

Installation of Solo modular stations are more adaptable to site conditions. We've designed them with lateral movement so they can be adjusted side-to-side to fill in rows and space stations out evenly. In addition to the side-to-side flexibility, modular worksurfaces can be installed in three front-to-back depth locations to create additional "belly room" for the occupant or installed to accommodate tight site conditions. Modular worksurfaces allow for easier installation and maintenance.

TELESCOPIC PLATFORMS

Telescopic platform seating continues to be utilized in more venues and in more applications than ever before. At Irwin Seating Company, we remain committed to the markets we serve by developing new and innovative telescopic seating solutions to meet the ever-changing needs of our customers. We do this by truly embracing the “voice of the customer” process.

This commitment and dedication has led us to our latest product developments which include two new seating options; the Prestige Series and Integra chair lines. Each has their own set of unique features and benefits that are sure to stand out from the crowd! We’ve also added further enhancements to our telescopic under-structure systems, and designed the new IDS power system to ensure smooth, dependable operation.

The next several pages showcase these and many other innovative solutions we offer, and how you too can experience the Irwin Difference!

PRESTIGE SERIES NOSE MOUNT SEATING

Our telescopic nose mount chairs have always offered unparalleled comfort and design continuity between the fixed seating and telescopic seating. The Prestige system is available with our most popular backs and seats like the No. 91 Millennium back pictured here.

The new Prestige Series is designed to assist the operations staff with the industry’s first semi-automated nose mount chair system! This unique design incorporates a spring assist system that aids in raising the backs, while dampening the folding motion. Simply activate the chair release mechanism and the backs automatically fold to the stored position. This innovative, patent pending design greatly reduces set-up and take-down times, while placing less physical stress on the crew.

PRESTIGE SERIES FORWARD FOLD SEATING

Like the Nose Mount system, the Prestige Series Forward Fold chair incorporates the same host of features and benefits into its design, while allowing the entire chair to fold in a more traditional means for storage. Prestige Forward Fold is available on telescopic units with a 14” or greater row rise.

The Stackable Riser System or SRS (shown below) features the same forward fold chair design in a low-rise, non-telescopic system. SRS units are typically used in facilities performing “changeovers” from hockey to basketball. Units are placed in front of the dasher boards to provide premium seating at court level. Once the permanently attached chairs are folded, a forklift is used to stack the units and transport them to a storage area.

INTEGRA SEATING

Integra was designed with a spacious sitting area and thoughtful contours to create an attractive, comfortable chair. Integra is available with upholstered pads for additional comfort.

The Integra beam mount system sets a new standard for functionality with a choice of manual or semi-automatic chair operation and multiple armrest options. The forward fold mechanism is supplied with a protective dust / debris cover to help reduce clean up times.

To address durability Integra has been engineered to meet all standard industry requirements for spectator seating as well as our own rigorous internal testing. Talk with your Irwin Seating representative today and find out if Integra is the right choice for your facility.

ENGINEERED FLEXIBILITY

Maximizing capacity and performing quick change-overs between events are critical requirements for today's multi-purpose arenas. Our telescopic products are engineered to meet those requirements while helping to provide patrons with a safe and comfortable experience.

Tapered / Custom Sections

The versatility of many of today's arenas lies in the end zone seating. Converting from maximum seating capacity to off-set ice or an end stage concert configuration is critical. We understand this concept and have the expertise to design a system to fit your exact requirements.

Low Rise Platforms

Low rise platforms, whether telescopic or demountable in design can be supplied with as little as 4" row rise and are typically used with folding chairs.

Spanner Decks

Lift-out spanner decks are located in the entrance areas of an arena and connect the precast or fixed platform units providing additional spectator seating. This spanner deck is shown with built-in forklift tubes.

Elephant Doors

Hydraulically operated elephant doors are another option for entrance areas and allow greater clearance for moving large objects into the arena, while also providing additional seating when in the lowered position.

Portable Towers

Portable or rolling towers are used when the section design and shape exceeds the limitations of a telescopic unit, or when a tunnel is required. These are commonly used for player entrances.

Wall Attached Units

Wall attached or recessed sections are the backbone of telescopic seating and used in most every configuration and available in either rectangular or tapered sections.

Portable Units

Portable sections play a vital role in creating the flexibility needed to reconfigure the seating for different types of events. Portable units can be designed to fit your specific requirements.

Airlift System

Portable units typically utilize a heavy-duty, built-in airlift system to raise the portable platform units off the floor. Once the platforms are raised the sections can be relocated by a series of compound swivel casters.

UNDERSTRUCTURE & INTEGRAL DRIVE SYSTEM

Alignment System

Nylon Glides

Deck Support Roller

Irwin Seating offers two telescopic understructure systems to choose from, the Model 4500 and Model 5000. Both deliver the solid foundation required for today's heavy use facilities, and include the same operational advantages (see details). Each model is available with all seating options, with the exception of the Prestige Series seating, which requires the Model 5000. To learn more about which model is right for your facility, contact your Irwin Seating Company representative today.

Our power operated telescopic systems use a heavy-duty Integral Drive System (IDS) that applies the operating forces directly to the first row of the understructure. This unique design creates reliable, consistent operation. IDS is also available with an optional steerable system that lets the operator make corrections when opening the unit up. Larger systems, individually operated sections and tapered section include a dual motor design (see inset) to ensure smooth operation and proper alignment. The IDS System is available in 208/480V 3-phase or 120V single phase, U.L. Listed system.

TABLET ARM ASSEMBLY

The flexibility of the No. 4 chair platform extends to its accessories and none illustrate this better than our self-storing tablet arm assembly. Available in four sizes, this tablet arm features a built-in, anti-panic mechanism for quick, easy storage under the armrest and a unique feature that allows the user to move the tablet in and out and place it into a position that is comfortable for them. While these features are nice, they mean nothing if the assembly is not durable. Based on our testing (and hundreds of installations), we know of no other self-storing writing tablet as strong as this one.

SMART RAILS

Safe and sound – that’s what you get with the Irwin Smart Rail and Smart Rail EX. It’s a fact, when aisle rails are loose or missing accidents can occur. With the Smart Rail by Irwin Seating that’s no longer a concern as rails are permanently attached and simply rotate for use or storage. Of course, another benefit is the reduction in operation times.

When you combine the safety and functionality of the Smart Rail with a customized aisle step that is always one half of the row rise and row spacing, you’ve helped to insure safe passage for your spectators.

WHEELCHAIR OPTIONS

Offering a single seating system to meet the ever-changing needs of today’s facilities is impractical, that’s why Irwin Seating offers a choice in wheelchair accessibility options.

The Modular Deck Units (MDU’s) shown to the right, quickly and easily adapt for continuous first row seating, wheelchair spaces with companion seating or truncations for team seating. Each MDU segment is manually opened and closed (friction power is located on row two) and does not require front rails by most building codes.

Individual spaces shown below can be provided in single or double spaces and allow for a companion seat. Individual spaces can be permanent or recoverable to provide additional seating if needed. Railings shown below are optional and not required by most building codes.

UNDERSTRUCTURE

A solid understructure is the foundation of any telescopic system, and Irwin Seating leads the way in overall performance with the Model 4500 system. This telescopic understructure is designed for heavy use facilities and has been used successfully in many major university and arena venues. The system is highlighted by its outstanding support roller system located at the deck support and cantilever locations. This and the many other details shown below ensure safe, smooth and consistent operation. For more information contact your Irwin Seating representative.

Alignment System

Lower alignment system allows the understructure to compensate for slight floor variations without the need for lubrication.

Nylon Glides

Nylon glides are attached to the wheel channels to prevent metal-to-metal contact, eliminating the need for lubrication.

Row Post Construction

Understructure supports are made of 1-1/2" x 3", 11-gauge structural steel tubing, welded 360 degrees to a 10-gauge formed wheel channel. Each wheel channel is equipped with a minimum of four 4" x 1" wheels for better load distribution.

INTEGRAL DRIVE SYSTEM

The Integral Drive System or IDS friction power system is uniquely designed to apply the operating forces directly to the first operating row of understructure for efficient and consistent operation. Our drive system is designed to include heavy-duty components for low maintenance costs and long life cycle value. The IDS is completely shrouded and U.L. listed for overall safety.

Cantilever Supports

Cantilever support arms are heavy-duty 3-1/4" wide, triple-formed 10-gauge steel, securely welded to the understructure support and feature a support roller for unparalleled performance.

Deck Supports

Numerous heavy steel deck supports provide a safe and sound walking surface while tying the nose beam, decking and rear riser beam into a secure assembly. Each deck support includes a support roller to ensure smooth operation while eliminating the need for lubrication.

Support Bracing

Understructure support bracing begins on row two and connects row posts to deck supports to prevent lateral sway and create a stable walking surface. The bracing is made from 14-gauge, U-shaped formed steel and connected with locking hardware.

OPERATIONAL TYPES

Wall Attached Units:

Wall Attached units is the most common operational type. Units are anchored at a minimum of two locations and open toward the event area while stacking against the wall in a minimal space.

Recessed Units:

These units are stored beneath a balcony or concourse level and utilize a special designed linkage that allows the system to clear the recess and open for normal use.

Forward or Reverse-Fold Units:

Often used in balconies or to separate a gym into two areas for class, these units allow for additional floor space behind the bleacher when closed. With the first row anchored to the floor, the unit travels in a rearward direction when opening.

Movable Options

With the design of today's multi-functional facilities, movable seating sections can be an integral part of the seating solution. Contact the factory for specific applications.

The built-in airlift system eliminates the need for lift truck storage and is supplied with an air compressor.

Using a pair of portable lift trucks allows each section to be relocated individually.

INSPIRED AESTHETICS

Fixed Seating enhancements

Fresh. Durable. Inspiring.

- Classic KI fixed seating gets a fresh, modern aesthetic with these new offerings. Design-friendly options are both aesthetic and practical: laminated wood seats, worksurfaces with multiplex edges, and frosted acrylic modesty panels.
- These heightened aesthetics meet or exceed ANSI BIFMA testing standards, which ensures unmatched product durability and peace of mind.
- Visually appealing lecture hall seating can inspire creative thinking, elevate interest and promote engaged learning.

Contemporary laminated wood seats (Apply™ seating) are contoured to provide comfort and support. “Ears” at top of back are a convenient place to hang backpacks. Available with or without upholstered seat pad.

Frosted, acrylic modesty panels are 1/4" thick and available in a variety of design-friendly colors.

The new 74M Multiplex edge (EMB) offers the look of exposed plywood with the performance of the 74P molded edge.
