**Required Federal contract provisions of Federal Regulations for Construction Contracts
for contracts with TIPS OR TIPS MEMBERS**

The following provisions are required to be in place and agreed if the procurement is funded in any part with federal funds.

The TIPS OR TIPS MEMBERS is the subgrantee or Subrecipient by definition. The Rules are located in 2 CFR PART 200 - Appendix II to Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards at 2 CFR PART 200

In addition to other provisions required by the Federal agency or non-Federal entity, all contracts made by the non-Federal entity under the Federal award must contain provisions covering the following, as applicable.

(D) Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to Federal Rule (D) above, when federal funds are expended by TIPS OR TIPS MEMBERS, during the term of an award for all contracts and subgrants for construction or repair, when Federal Funds are expended, by the TIPS OR TIPS MEMBERS resulting for this procurement process the vendor will be in compliance with all provisions listed or referenced therein.

(E) Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-Federal entity in excess of \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be

required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Pursuant to Federal Rule above, when federal funds are expended by TIPS or TIPS Members, the proposer certifies that during the term of an award by the TIPS OR TIPS MEMBERS resulting from this procurement process for construction contracts awarded by grantees and subgrantees the proposer agrees to be in compliance with all requirements listed or referenced therein.

***Continuous Contract:** Any existing written agreement (including any renewals that are exercised) between a prime contractor and a HUB vendor, where the HUB vendor provides the prime contractor with goods or service under the same contract for a specified period of time. The frequency the HUB vendor is utilized or paid during the term of the contract is not relevant to whether the contract is considered continuous. Two or more contracts that run concurrently or overlap one another for different periods of time are considered by CPA to be individual contracts rather than renewals or extensions to the original contract. In such situations the prime contractor and HUB vendor are entering (have entered) into "new" contracts.

HUB Subcontracting Plan (HSP)

In accordance with Texas Gov't Code §2161.252, the contracting agency has determined that subcontracting opportunities are probable under this contract. Therefore, all respondents, including State of Texas certified Historically Underutilized Businesses (HUBs) must complete and submit this State of Texas HUB Subcontracting Plan (HSP) with their response to the bid requisition (solicitation).

NOTE: Responses that do not include a completed HSP shall be rejected pursuant to Texas Gov't Code §2161.252(b).

The HUB Program promotes equal business opportunities for economically disadvantaged persons to contract with the State of Texas in accordance with the goals specified in the 2009 State of Texas Disparity Study. The statewide HUB goals defined in 34 Texas Administrative Code (TAC) §20.13 are:

- **11.2 percent for heavy construction other than building contracts,**
- **21.1 percent for all building construction, including general contractors and operative builders' contracts,**
- **32.9 percent for all special trade construction contracts,**
- **23.7 percent for professional services contracts,**
- **26.0 percent for all other services contracts, and**
- **21.1 percent for commodities contracts.**

- - Agency Special Instructions/Additional Requirements - -

In accordance with 34 TAC §20.14(d)(1)(D)(iii), a respondent (prime contractor) may demonstrate good faith effort to utilize Texas certified HUBs for its subcontracting opportunities if the total value of the respondent's subcontracts with Texas certified HUBs meets or exceeds the statewide HUB goal or the agency specific HUB goal, whichever is higher. When a respondent uses this method to demonstrate good faith effort, the respondent must identify the HUBs with which it will subcontract. If using existing contracts with Texas certified HUBs to satisfy this requirement, only contracts that have been in place for five years or less shall qualify for meeting the HUB goal. This limitation is designed to encourage vendor rotation as recommended by the 2009 Texas Disparity Study.

Considering the nature of this RFQ as a Purchasing Cooperative, no HUB requirement goal has been explicitly stated. Based on McKinstry's previous experience and our understanding of the State of Texas entities, it is our desire to employ HUB subcontractors to assist in our work. McKinstry proposes achieving a HUB goal of 25% on all Comprehensive HVAC projects, which is considered acceptable to most State entities. All HUB participants will be Texas Certified HUB vendors.

- The respondent must submit monthly compliance reports (Prime Contractor Progress Assessment Report – PAR) to the contracting agency, verifying its compliance with the HSP, including the use of and expenditures made to its subcontractors (HUBs and Non-HUBs). (The PAR is available at <http://www.window.state.tx.us/procurement/prog/hub/hub-forms/progressassessmentrpt.xls>).
- The respondent must seek approval from the contracting agency prior to making any modifications to its HSP, including the hiring of additional or different subcontractors and the termination of a subcontractor the respondent identified in its HSP. If the HSP is modified without the contracting agency's prior approval, respondent may be subject to any and all enforcement remedies available under the contract or otherwise available by law, up to and including debarment from all state contracting.
- The respondent must, upon request, allow the contracting agency to perform on-site reviews of the company's headquarters and/or work-site where services are being performed and must provide documentation regarding staffing and other resources.

Enter the item number and description of the subcontracting opportunity you listed in SECTION 2, Item b, of the completed HSP form for which you are completing the attachment.

Item Number: _____ Description: _____

SECTION B-2: MENTOR PROTÉGÉ PROGRAM

If respondent is participating as a Mentor in a State of Texas Mentor Protégé Program, submitting its Protégé (Protégé must be a State of Texas certified HUB) as a subcontractor to perform the subcontracting opportunity listed in SECTION B-1, constitutes a good faith effort to subcontract with a Texas certified HUB towards that specific portion of work.

Check the appropriate box (Yes or No) that indicates whether you will be subcontracting the portion of work you listed in SECTION B-1 to your Protégé.

- Yes (If *Yes*, to continue to SECTION B-4.)
- No / Not Applicable (If *No* or *Not Applicable*, continue to SECTION B-3 and SECTION B-4.)

SECTION B-3: NOTIFICATION OF SUBCONTRACTING OPPORTUNITY

When completing this section you MUST comply with items a, b, c and d, thereby demonstrating your Good Faith Effort of having notified Texas certified HUBs and trade organizations or development centers about the subcontracting opportunity you listed in SECTION B-1. Your notice should include the scope of work, information regarding the location to review plans and specifications, bonding and insurance requirements, required qualifications, and identify a contact person. When sending notice of your subcontracting opportunity, you are encouraged to use the attached HUB Subcontracting Opportunity Notice form, which is also available online at <http://www.window.state.tx.us/procurement/prog/hub/hub-subcontracting-plan>.

Retain supporting documentation (i.e., certified letter, fax, e-mail) demonstrating evidence of your good faith effort to notify the Texas certified HUBs and trade organizations or development centers. Also, be mindful that a working day is considered a normal business day of a state agency, not including weekends, federal or state holidays, or days the agency is declared closed by its executive officer. The initial day the subcontracting opportunity notice is sent/provided to the HUBs and to the trade organizations or development centers is considered to be "day zero" and does not count as one of the seven (7) working days.

- a. Provide written notification of the subcontracting opportunity you listed in SECTION B-1, to three (3) or more Texas certified HUBs. Unless the contracting agency specified a different time period, you must allow the HUBs at least seven (7) working days to respond to the notice prior to your submitting your bid response to the contracting agency. When searching for Texas certified HUBs, ensure that you use the State of Texas' Centralized Master Bidders List (CMBL) and Historically Underutilized Business (HUB) Search directory located at <http://mycpa.state.tx.us/tpasscmbsearch/index.jsp>. HUB Status code "A" signifies that the company is a Texas certified HUB.
- b. List the three (3) Texas certified HUBs you notified regarding the subcontracting opportunity you listed in SECTION B-1. Include the company's Vendor ID (VID) number, the date you sent notice to that company, and indicate whether it was responsive or non-responsive to your subcontracting opportunity notice.

			<input type="checkbox"/> - Yes <input type="checkbox"/> - No

- c. Provide written notification of the subcontracting opportunity you listed in SECTION B-1 to two (2) or more trade organizations or development centers in Texas to assist in identifying potential HUBs by disseminating the subcontracting opportunity to their members/participants. Unless the contracting agency specified a different time period, you must provide your subcontracting opportunity notice to trade organizations or development centers at least seven (7) working days prior to submitting your bid response to the contracting agency. A list of trade organizations and development centers that have expressed an interest in receiving notices of subcontracting opportunities is available on the Statewide HUB Program's webpage at <http://www.window.state.tx.us/procurement/prog/hub/mwb-links-1/>.

- d. List two (2) trade organizations or development centers you notified regarding the subcontracting opportunity you listed in SECTION B-1. Include the date when you sent notice to it and indicate if it accepted or rejected your notice.

Warranty

McKinstry Warranties/Guarantees

McKinstry's guarantee of performance allows us to commit to our clients that the equipment and systems installed will meet or exceed established performance standards. Our first priority will be to make certain that all newly installed equipment and systems will operate to ensure occupant safety, health, and comfort. The second priority will be to meet the project's operational and utility savings. If the equipment is maintained based on the manufacturer's guidelines, yet it does not meet the first and/or second priority, McKinstry will take the necessary steps to correct or improve equipment performance. If it is determined that the newly installed equipment has failed, we will find a final repair resolution or we will replace it.

McKinstry offers more options due to our network of buying power and our relationships with local equipment providers. We are able to reduce the initial cost of equipment, in addition to being able to arrange for extensions to the warranty period of the equipment. This combination of strong buying power and extended warranties gives us a value-added advantage we will pass on to you.

WARRANTY ENFORCEMENT ROLE

McKinstry can implement our Knowledge Response Center (KRC), an innovative 24x7 web-based system suite that allows clients to log and track warranty issues. The KRC utilizes InfoCentre™ to document relevant facility data and work flow processes in order to effectively and efficiently manage the warranty, and remote monitoring to enable the flow of real time and proactive site-specific information using the building automation systems. InfoCentre powers and serves as the information hub for our services—clients will be able to view warranty requests, note when the issue was logged, view progress on the issue, and receive confirmation when the issue is resolved. All this is handled seamlessly with minimal time commitment from the client organization. In addition, this process provides a single repository of archived information relevant to your specific facilities. Our standard warranty services include:

- Development and management of the warranty work order process;
- Management of the vendor dispatch process;
- Tracking and follow up on completion of work;
- Routine vendor performance reporting;
- Follow up with customer and project team on work satisfaction;
- Ongoing equipment status and warranty work reporting details; and
- Warranty preventative maintenance management and scheduling.

We will commission waste to energy and other future projects to ensure all equipment and systems installed will meet or exceed performance standards. We guarantee its installation and workmanship for one year against defects. Equipment typically carries the manufacturer's warranties, yet based on our relationship with vendors, we will extend warranties at no or low cost. Your warranty time period starts at date of substantial completion or occupancy. If equipment is used for temporary service, its warranty date typically will start when it is put into service.

COMMITMENT TO LONG-TERM PARTNERSHIP

McKinstry is very experienced in system performance and warranty concerns. We understand the value of equipment performing as intended. We routinely complete services—at no additional cost to the customer—after the original warranty expires to ensure our clients are satisfied and that the system operates as intended. McKinstry will provide the client with a single point of contact for long-term accountability regarding maintenance and training on all new equipment installed as part of any project.

Energy Services

Energy Efficiency | Innovation | Guaranteed Value

THE ESPC PROCESS STEP-BY-STEP

The following steps lead you through a typical energy services performance contracting project.

STEP 1

Speak with an Energy Service Company to determine if performance contracting is right for you.

STEP 2

Select an Energy Service Company.

STEP 3

Identify Projects and Buildings.

STEP 4

Negotiate an Energy Service Performance Contract.

STEP 5

Project Acceptance – Includes project review to confirm all systems were installed as specified and standards of comfort agreed upon in the contract are being met.

McKinstry is committed to delivering high-integrity projects with unparalleled benchmarks for performance, quality, transparency, and service. McKinstry works closely with your team throughout the process of developing and implementing energy savings projects. Our best-in-class technical services ensure superior projects without excess markups or project cost escalation. Our focus on value frees up more dollars for equipment, materials, and construction, allowing you to implement greater scopes of work. Your funds are spent on the project — not on increased overhead and margins.

PROGRAM SERVICES

McKinstry is dedicated to excellence in design, construction, and facilities operation. We strive to develop innovative, cost effective facility solutions for you. Below are the services we can deliver under our energy services program:

Energy Auditing

Our engineering-based approach to auditing, coupled with extensive site investigations and interviews, will generate a project that meets all of your financial, facility, and operational objectives.

Building Modeling/Building Design/Cost Estimating Phase

McKinstry utilizes a Total Cost of Ownership (TCO) model throughout a project's development that allows us to evaluate all options and optimize the design scenario. TCO aids in design and construction choices to maximize the present value of all first costs and the value delivered over the life of a facility asset.

Guaranteed Results/Monitoring & Verification

We guarantee up to 100% of energy savings on applicable scopes of work. We provide staff training and proper commissioning of systems to ensure these savings are achieved. We develop a measure-specific performance assurance program to confirm optimal system performance is achieved and maintained.

Financing

McKinstry is a financially strong company; we can directly secure funding for large Energy Savings Performance Contract projects or partner with third-party financial institutions to arrange optimum funding.

Construction Management

As prime contractor, McKinstry takes full responsibility for successful project delivery and execution. Our 50 years of pre-construction, construction, and project management experience is vast.

Energy Services

Commissioning

Our start-up, self-performance competency includes stem balancing, control system testing, and digital archiving of building design and performance data – all focused on operational stability.

Training

A well-trained facilities staff has a direct impact on annual savings, occupant thermal comfort, and equipment life. McKinstry will take your team through an extensive training program presented by a consortium of subcontractors, engineers, and suppliers, and will document the training for later review.

Operations & Maintenance

We develop an engineered maintenance plan that lists the various service tasks and frequency for all of the applicable system components. This comprehensive approach helps you to optimize system performance and life.

Energy Management

Our team of energy management experts can help your organization develop an energy management plan that incorporates energy data management, expert performance analysis, and identification of ongoing savings opportunities to ensure that your facilities continue to meet your energy and sustainability goals over time.

APPROACH

No Premium for the Energy Services Delivery

Integrated delivery provides high performance turnkey projects at pricing comparable to typical construction industry standards.

Open Book Pricing & Guaranteed Maximum Price (GMAX)

We provide complete transparency of all construction costs and professional services fees – including overhead and profit percentages. There are no shared savings – 100% of additional benefits are passed on to the customer.

Single-Point of Accountability

At McKinstry, a single point of contact is available and empowered to make decisions. Our professional engineers stamp our MEP designs, demonstrating our responsibility for our services.

Quantifiable Performance Benchmarks

We use third party international protocols as the standard for measuring and verifying performance and efficiency guarantees for our energy projects.

Energy Services

Vendor Neutrality

We use products and materials that our clients specifically request or are the most competitive in quality or values. This allows us to develop the best total solution for you.

INNOVATION

McKinstry goes far beyond the typical energy services model. We excel not only at innovative design and engineering, but at optimizing your investment through grants, incentives, and project financing that significantly impacts your bottom line.

Other innovations include:

- Aggressive pursuit of utility incentives and grants
- Evaluation of sustainable energy systems
- Issue Management Services—backed by our 24x7x365 fully-staffed facility support center
- Comprehensive infrastructure commissioning and retro-commissioning services
- Performance-based design-build high performance LEED services for existing buildings and new construction

Design/Build New Construction

Superior Energy & Operational Efficiency | Improved Indoor Environment

The energy and operational challenges of today place increasing demands on your organization. Because of rising costs and energy escalation, too often you are forced to cut into already tight budgets or eliminate programs and services simply to maintain your operating environment. McKinstry can help. We provide innovative ways to reduce operational expenses while maximizing your use of sustainable energy practices.

New construction does not have to adhere to the limitations of old technology or low-bid/low-performance construction practices. Our high-performance integrated design-build process makes full use of innovative approaches to building performance and can pave the way for increased efficiencies, reduced energy consumption, sustainability and the lowest Total Cost of Ownership™. This means you can allocate more resources to your organization's core missions and provide a healthier, safer, and more productive, energy efficient environment for your staff and occupants.

What does high performance mean? At a minimum, McKinstry high performance buildings are 30% more energy efficient than specified by the International Energy Conservation Code, have a reduced carbon footprint, and qualify for either a LEED or Energy Star certification. In addition to providing improved operational efficiencies, we identify, measure, and verify mission-specific performance benchmarks. For example, school districts may wish to track test scores, while commercial clients may wish to track staff productivity. In addition to operational excellence, our facilities provide superior financial and life-cycle performance at competitive construction cost.

Total Cost of Ownership Analysis

This tool takes all life cycle costs into account, not just first costs, enabling the strongest designs for your building goals. This tool is particularly valuable for Owners who are interested in best performance and the lowest long-term operating costs—not just lowest first costs.

PROGRAM SERVICES

McKinstry offers a full range of high performance integrated design-build services that ensure you get the maximum value out of your new construction capital spend. Not only are we there from initial concept to design and build, we aid you in finding the best ways to finance the project, including working with utility companies to garner rebates, applying for available grant funding, financing subsidies, carbon credits, and helping to earn public support for the project so that necessary bonds are passed. Our involvement doesn't stop when we turn over the keys to your new building—we make sure that your

Design/Build New Construction

facility services team is fully trained and equipped to maximize the savings potential of your new equipment and systems. Our services can include:

Educational Outreach

We involve your building's occupants so they will support sustainable practices in their new environment. We'll work with you to build Internet-accessible dashboards that display energy consumption and savings in your new building. For schools, we can develop curricula for science/math courses that encourage a deeper understanding of energy in the immediate environment.

Active Energy Management

Provides benchmarking and measures usage against key performance indicators and goals, and fine tunes system performance. Reporting services turn raw data into information that drives effective decisions and real operational cost savings.

Active Issue Management

Provides remote monitoring of your critical systems to identify issues before they flare into problems that drain your budget and cost your staff precious time.

Public Education Campaigns

For public entities, garnering overwhelming public support is necessary to implementing a successful bond election campaign. We provide comprehensive public education campaigns to educate the public on the substantial financial and operational benefits to high-performance facilities. We have been extremely successful in helping to pass bonds in areas requiring super-majority margins.

Empowering continuous improvement

According to Lawrence Berkeley National Laboratory's 2009 study¹, commissioning is "arguably the single-most cost-effective strategy for reducing energy use, costs, and greenhouse gas emissions in buildings." Their study found that commissioned projects' savings tend to persist or even slightly increase over time.

Existing building commissioning, also known as retro-commissioning, aims to achieve two goals – to make building systems integrate and operate together now and to provide the tools necessary for future performance improvement. Commissioning professionals identify and analyze both low/no-cost and more capital-intensive improvement measures and assist the owner in strategically implementing these improvements.

MCKINSTRY'S VALUE

We support your building's performance For the Life of Your Building. Leveraging the building management system—and our expertise—we periodically evaluate system operations and ensure that a facility operates as designed. Depending on system criticality or power usage, the systems can be monitored in real time.

We do not just provide a list of issues that need fixing—we help you plan how to fix them. Unlike our competition, we have experience implementing projects and can provide construction-ready costs and the necessary scopes of work.

We educate your operators on how to optimize the performance and efficiency of your building's systems. Our commissioning service includes enhanced or ongoing technical training for operators and light training for occupants.

We are un-matched problem solvers. We are unique in employing a broad array of in-house facility expertise that our commissioning professionals have access to. We do not need to reach out to another company, propose joint ventures, or wait for an answer. We can bring in the right person, such as an energy engineer, at the right time.

APPROACH

The same Lawrence Berkeley National Laboratory study¹ found that projects with a comprehensive approach to commissioning (measured in terms of the number of pre-defined steps/phases included in the commissioning process) attained nearly twice the overall median level of savings and five-times the savings of the least-thorough projects.

McKinstry's approach is comprehensive. Instead of piecemeal projects, we offer comprehensive solutions focused on a master plan so that no effort is wasted.

HEAR FROM OUR CUSTOMERS

"My association with McKinstry of the TAB portion of [the Boise State University project] was one of complete professionalism. Their knowledge of the various systems was instrumental in identifying and resolving issues throughout the pre-commissioning and TAB activities, laying the foundation for a cooperative commissioning process."

— David Rosencrantz, Special Teams Engineer, Engineered Structures Inc.

"McKinstry provided valuable oversight of the design process, always keeping in mind the benefits and operating costs associated with different mechanical systems and assisted us in designing and constructing mechanical systems that are functional, serviceable, and efficient."

— Eric C. Ewing, SPHR, Director of Human Resources & Facilities, High Plains Library District

"I was impressed with McKinstry's project knowledge, personnel, their attention to detail and willingness to work hard to deliver a fully functional facility. They took the time to help with the systems operation training of the city staff who would be operating the facility in the long term."

— Kenneth J. Fisher, Owner's Construction Representative, Hugh Nichol's Public Safety Building

Local partners in efficient, high performing facilities

We understand that our clients face unprecedented challenges—budget cuts, staffing shortages, and legislative changes to name a few. We implement solutions that mitigate the impact of these risks and allow you to focus on meeting the needs of your organization and community. Success is defined collaboratively with you—and the relationship doesn't end when the project ends. We make a commitment to you for the life of your building.

Our teams understand your unique challenges, offer you resources, and provide tailored insights to improve facilities. But we also know you want to impact more than just your buildings; you want to improve conditions for your employees, your patients, students, or citizens, and the greater community. McKinstry's partnership-oriented approach means our clients are actively involved in planning and overseeing their one-of-a-kind projects.

In addition, our value to clients includes:

GREAT PEOPLE

McKinstry hires skilled and passionate employees. Our people have the technical knowledge and experience to provide specialized services such as energy management, renewable installations, and retro-commissioning. Customers have access to our array of experts locally and nationwide, but can always find a single point of contact and accountability on each project.

TRUSTED PARTNERSHIP

We are committed to establishing and maintaining for you a sense of safety, trust, stability, and certainty in your investment with us. We think about the life of your building—not lucrative short-term projects that fail to meet the needs of the staff or communities who hire us. Each year, at least half of our business comes from legacy customers who trust us to continue to deliver the results they've come to expect through our past work with them.

OPTIMAL SOLUTIONS

While some businesses may offer a packaged approach to energy services, McKinstry likes to explore the opportunities specific to your facilities, organization, goals, and needs. Whether your challenges stem from financial constraints, building functionality, system operations, or other issues, McKinstry will offer open and honest recommendations specific to your unique situation.
