***Continuous Contract:** Any existing written agreement (including any renewals that are exercised) between a prime contractor and a HUB vendor, where the HUB vendor provides the prime contractor with goods or service under the same contract for a specified period of time. The frequency the HUB vendor is utilized or paid during the term of the contract is not relevant to whether the contract is considered continuous. Two or more contracts that run concurrently or overlap one another for different periods of time are considered by CPA to be individual contracts rather than renewals or extensions to the original contract. In such situations the prime contractor and HUB vendor are entering (have entered) into "new" contracts.

HUB Subcontracting Plan (HSP)

In accordance with Texas Gov't Code §2161.252, the contracting agency has determined that subcontracting opportunities are probable under this contract. Therefore, all respondents, including State of Texas certified Historically Underutilized Businesses (HUBs) must complete and submit this State of Texas HUB Subcontracting Plan (HSP) with their response to the bid requisition (solicitation).

NOTE: Responses that do not include a completed HSP shall be rejected pursuant to Texas Gov't Code §2161.252(b).

The HUB Program promotes equal business opportunities for economically disadvantaged persons to contract with the State of Texas in accordance with the goals specified in the 2009 State of Texas Disparity Study. The statewide HUB goals defined in 34 Texas Administrative Code (TAC) §20.13 are:

- 11.2 percent for heavy construction other than building contracts,
- 21.1 percent for all building construction, including general contractors and operative builders' contracts,
- 32.9 percent for all special trade construction contracts,
- 23.7 percent for professional services contracts,
- 26.0 percent for all other services contracts, and
- 21.1 percent for commodities contracts.

- - Agency Special Instructions/Additional Requirements - -

In accordance with 34 TAC §20.14(d)(1)(D)(iii), a respondent (prime contractor) may demonstrate good faith effort to utilize Texas certified HUBs for its subcontracting opportunities if the total value of the respondent's subcontracts with Texas certified HUBs meets or exceeds the statewide HUB goal or the agency specific HUB goal, whichever is higher. When a respondent uses this method to demonstrate good faith effort, the respondent must identify the HUBs with which it will subcontract. If using existing contracts with Texas certified HUBs to satisfy this requirement, only contracts that have been in place for five years or less shall qualify for meeting the HUB goal. This limitation is designed to encourage vendor rotation as recommended by the 2009 Texas Disparity Study.

MDI UNDERSTANDS THE IMPORTANCE OF CREATING ORDER QUICKLY AND DECISIVELY FOR TRAFFIC INCIDENT MANAGEMENT OR EMERGENCY SITUATIONS.

Our rapid-deploying MDI Compact® Sign System sets up in less than 20 seconds to effectively inform, guide and protect motorists and improve the safety of first responders.

//TRAFFICMASTER® SIGN SYSTEM//

TrafficMaster sign systems provide a critical component of the traffic incident management area — keeping emergency responders safe.

Improves visibility — Retroreflective sign material returns 60 to 70% of incoming light back to the light source. The sign shows up brightly in headlights or ambient daylight – close up or from thousands of feet away – even when lights are not facing the sign directly.

Improves effectiveness — Use of advance warning signs gives the motorist time to react and adjust to an incident in the roadway.

Improves communication — TrafficMaster sign systems provide concise messages and direction to oncoming traffic.

NFPA 1500 mandates the use of 48" x 48" retroreflective signs, cones and/or illuminated warning devices for traffic incident management. MUTCD mandates the use of advance warning signs and other appropriate traffic control devices for control of traffic through incident management areas.*

Strong Communication

Give motorists precise information. Retroreflective signs are highly visible — day or night.

Advance Warning

Allows motorists time to perceive and react.

*NFPA 1500, 2007 Edition, section 8.7.5. MUTCD Chapter 6I requires advance warning signs at the major level and recommends their use at minor and intermediate duration incidents.

TrafficMaster® Sign Stand – Fastest Setup and Maximum Wind Performance.

//TRAFFICMASTER® SIGN STAND//

The TrafficMaster sign stand is specially engineered for portability, ease of handling, and reliable performance at emergency scenes.

- ◆ Quick and easy one-person setup without tools.
- ◆ Kick-release legs simplify setup and handling.
- ◆ Dual-spring base for strong initial tension resists twisting and turning of sign, even in high wind gusts.
- ◆ Aircraft aluminum alloy legs and uprights include anti-skid leg caps. Adjustable telescoping legs stabilize sign stands on curbs or uneven terrain.
- ◆ Compact and convenient storage.
- ◆ Designed for use with long-lasting MDI Compact® signs.

TRAFFICMASTER® SIGN STANDS
ARE BACKED AGAINST DEFECTS IN
WORKMANSHIP, PARTS AND MATERIALS.

Uneven terrain

Adjustable legs for stability on curbs and uneven terrain.

DROP & LOCK UPRIGHT

The molded cap helps to channel your MDI® crossbrace into the upright. The spring-loaded pin automatically locks your MDI Compact sign in place.

//COMPACT® COLLAPSE & WRAP SIGN SYSTEM//

The MDI Compact Collapse & Wrap Sign System is comprised of an MDI Compact sign and a TrafficMaster® sign stand (each sold separately). Once the sign is mounted to the stand, it becomes one unit and, if desired, the sign can stay in place in the stand. To store, the sign instantly collapses down using the single trigger release button and wraps around the upright on the stand. The rapid deployment significantly improves safety and efficiency in traffic incident management areas.

◆ Sign stand and sign sets up in less than 20 seconds.

◆ Flexible fiberglass crossbrace enhances wind performance.

Single Trigger Release
The patented MDI Compact Collapse & Wrap sign system features signs that have hinged, integrated crossbracing with a single trigger release mechanism for rapid deployment and take-down.

An optional flag bracket is available. It must be ordered with your sign system, as it is permanently attached to the crossbrace during manufacturing.
