Texas Education Code Chapter 22 Contractor Certification for Contractor Employees

Introduction: Texas Education Code Chapter 22 requires entities that contract with school districts to provide services to obtain criminal history record information regarding covered employees. Contractors must certify to the district that they have complied. Covered employees with disqualifying criminal histories are prohibited from serving at a school district.

Definitions: Covered employees: Employees of a contractor or subcontractor who have or will have continuing duties related to the service to be performed at the District and have or will have direct contact with students. The District will be the final arbiter of what constitutes direct contact with students. Disqualifying criminal history: Any conviction or other criminal history information designated by the District, or one of the following offenses, if at the time of the offense, the victim was under 18 or enrolled in a public school:

(a) a felony offense under Title 5, Texas Penal Code; (b) an offense for which a defendant is required to register as a sex offender under Chapter 62, Texas Code of Criminal Procedure; or (c) an equivalent offense under federal law or the laws of another state. certify that: (Section A) of the employees of Contractor and any subcontractors are covered employees, as defined above. If this box is checked, I further certify that Contractor has taken precautions or imposed conditions to ensure that the employees of Contractor and any subcontractor will not become covered employees. Contractor will maintain these precautions or conditions throughout the time the contracted services are provided. (Section B) or all of the employees of Contractor and any subcontractor are covered employees. If this box is checked, I further certify that:

(1) Contractor has obtained all required criminal history record information regarding its covered employees. None of the covered employees has a disqualifying criminal history.

(2) If Contractor receives information that a covered employee subsequently has a reported criminal history, Contractor will immediately remove the covered employee from contract duties and notify the District in writing within 3 business days.

(3) Upon request, Contractor will provide the District with the name and any other requested information of covered employees so that the District may obtain criminal history record information on the covered employees.

(4) If the District objects to the assignment of a covered employee on the basis of the covered employee's criminal history record information, Contractor agrees to discontinue using that covered employee to provide services at the District.

Noncompliance or misrepresentation regarding this certification may be grounds for contract termination.

# Chapter 3

## Capability

## Ability to Work with the Owner and Architect

Contech will act as a general contractor or a construction manager. We can also facilitate a project in a design build concept. Along with those three general contracting approaches, Contech is a Varco Pruden Pre-engineered Metal Building Dealer. On some occasions, but not all, Contech will perform such trades as metal building erection and cast in place concrete work. We have equipment on hand to be utilized on the job including an excavator, dozer, backhoe, and a sky track.

When Contech completes a project, the communication between the owner, contractor, and architect is vital to the success of a project. For Contech, we must build a great working relationship with the owner and the architect. The key to a construction project is to affordably meet the owner's needs. We will be at all meetings with owner and/or the architect to answer any questions the architect or owner might have to the completion methods of the project. We will also be there to give valuable insight into the affordability of design concepts and cost efficient alternative design concepts. We will work with the owner and the architect to establish construction material lists and design concepts that are the most economic and functional option. We will also be there to provide samples of the materials during the design phase. We will work with the owner and the architect to provide valuable life cycle analysis of materials and equipment used in the projects. We will work with the architect to establish the materials used and compile subcontractor and supplier documents for each aspect of the project for bidding purposes.

# Ability to Meet the Project Budget

---

When estimating the budget for a construction manager project, we at Contech treat it similar to a bid project once plans are set. The owner will know how much he is paying for each phase and trade and can make decisive changes if need be. We feel this provides an open and transparent view of the cost for the customer. Please see the attached cost workbook on the following page.

Any savings from the initial construction cost estimate goes directly back to the customer. We feel as a construction manager that we are representing the owner and the owner must be made aware of the cost of what they are getting in return. This is a substantial characteristic of the relationship we feel a contractor and the owner must keep in their communication.

Contech understands that the budget is a crucial component of a project. In the event the cost is over the desired budget, we will work with the owner and architect to provide value analysis of alternative options for the project while still maintaining the design and functionality. We will work with the architect to achieve sustainable construction and provide life cycle analysis of equipment utilized in the project.

The project budget will be utilized for cost control of the project and the budget will not increase. However, in some instances there are circumstances where a change order might be utilized in the project at the request of the owner, architect, or contractor. We will work with the owner and the architect to resolve these matters in the most cost efficient way. Sometimes these issues even result in a credit being given back to the owner.

Contech will establish a guaranteed maximum price (GMP) for the owner's approval similar to the budget. Contech will work with all subcontractors once the GMP has been approved and manage the construction project from start to completion. Contech will issue our subcontract between Contech and all project subcontractors for the project. We have an established subcontract that we use exclusively for the benefit of us and the owner. Contech will require submittals from the subcontractors in a timely manner and provide them to the architect for approval in all materials for the project to ensure cost effectiveness and quality is met.

For subcontractors and suppliers, Contech's payment terms are net 30. We will update the schedule of values based on completed work monthly and provide this to the owner and architect. We in turn will pay the subcontractors and suppliers. Contech is proud of the fact that no projects have had claims against them and we will continue to strive for this goal in all our projects. In the event there is a claim, we will work to resolve the issue in the most expedited manor.

# Ability to Secure Competitive Subcontractor and Material Pricing

---

Each phase and trade will be quoted out and contractors vetted for reliability and performance. We have an established database of subcontractors and suppliers to ensure qualified and efficient subcontractors are used.

Once the plans and specifications have been completed subcontractors will be solicited, Contech will both solicit our database of subcontractors as well as solicit through news sources. We will use the designated bid packages and supplier packages to vet reliability and cost. Contech will utilize their team to compile bids and complete a comparative analysis to ensure the most cost effect and qualified subcontractor/suppliers are utilized for the project to ensure all areas and scopes of work are accounted for and the suppliers and subcontractors are utilized to establish the guaranteed maximum price.

*Above: An exterior picture of the Texarkana Airport Flight School, another example of the quality work that Contech achieves.*

## Ability to Prepare and Follow the Construction Schedule

---

Contech will work with the owner and the architect to complete the project within the desired timeline of the owner. We will have a superintendent on site who will coordinate the onsite work and a project manager who will ensure all the proper materials are delivered to the site based on when they will be needed in the schedule.

Once subcontractors and suppliers have been selected, Contech will provide a critical path methods (CPM) schedule for the project and work to complete the project in the least amount of time while maintaining the integrity and design of the building. Contech will update and follow the CPM schedule weekly and ensure that all work is completed by the established milestone dates. Our first step in the schedule is to order materials which will require time to be manufactured and delivered to the job to ensure everything runs efficiently once the project is started. Please see the following page with a sample project schedule.

Contech has completed many projects that were required to be completed by a deadline for the owner. Contech completed the renovation and addition to Grim Stadium for the Texarkana Independent School District during the course of one summer. The project was carefully scheduled so that there was no down time and every milestone was achieved in order for the TISD to have their last soccer game in the stadium and have their first football game of the season in their newly renovated and updated stadium. Key personnel who helped in completing Grim Stadium under stringent deadlines including Gary Douglas and Garry Jordan will be utilized in construction projects.

Contech will conduct weekly project meetings with the architect and the owner to ensure that all CPM schedule milestones are met and all discussions/questions from the architect and the owner can be addressed.

Contech strives to maintain the utmost quality in a project and ensure every detail of the plans is met. This is why we have a superintendent on site to ensure quality control in the project and all material submitted and approved by the subcontractors will be put in place. Once substantial completion has been achieved, Contech will work with the owner to create a punch list of items to be completed, and they will be completed in the most time efficient and quality manner. Then we will start the close out process and provide the owner with warranties on materials and a workmanship warranty. Contech will be available during the warranty period to assist the owner in anyway. Contech will maintain the records for the project after completion.
