Fort Bend ISD:

Netsync has been the prime contractor for Fort Bend Independent School District (“Fort Bend ISD”) from 2013-present. During that time we have deployed over 10,000 laptops. Our deployments included imaging, asset tagging, delivery, and installation services at over 60 locations across the school district. Key success factors were logistics and planning with over 10 deployment teams utilized to meet Fort Bend ISD deadlines while continually supporting run rate business throughout the school year.

Houston ISD:

For Houston Independent School District (“Houston ISD”), Netsync has upgraded over 210 schools with one Cisco 3602 access point (AP) per classroom, Cisco Catalyst 3560 Power over Ethernet (PoE) switches in the intermediate distribution frames (IDFs) and main distribution frames (MDFs), and a core Cisco Catalyst 6504 switch. Netsync also upgraded Houston ISD’s data center, where the existing platform was upgraded to a Cisco Nexus platform. An additional 40+ schools were refreshed by Netsync in early 2015.

Houston ISD supports approximately 215,000 students across 283 school campuses, making it the largest school district in the state of Texas and the seventh largest school district in the United States. The district leverages Netsync as its primary technology partner, and over the course of our partnership, Netsync has had the privilege to design and implement several key projects including the implementation of a Special Education initiative, proposed as a nationwide solution, entailing the deployment of nearly 600 tablets for special education students, each installed with specialized software and touch screen monitors. Because of the special needs of these students, special consideration was required on a campus-by-campus, and even student-by-student basis. In addition to the design and deployment, Netsync is still leveraged by Houston ISD for the ongoing hardware and software support of these devices. In 2013, we began another major project including a refresh to core and access layer networking and wireless. This endeavor encompassed the configuration and installation of 194 HP DL380 servers, 194 Cisco 6504E gateways, 3,400 3560X Cisco multilayer switches, and over 10,000 Cisco 3602i wireless access points. By working closely with the IT group and individual campuses, scheduling around testing periods and other critical education tasks, we achieved the completion of the project within the proposed time frame. Netsync approaches each project with the understanding that it is unique and the specific goals of our clients are our highest priority.

San Antonio ISD:

San Antonio ISD (“SAISD”) currently has over 58,000 students and relies heavily on E-Rate funding procedures to complete large scale technological upgrades; a client for over six years, Netsync has proven to be SAISD’s trusted partner for procuring and installing Cisco systems. Netsync successfully upgraded all edge switching devices at 85 campuses throughout the district. In addition, Netsync upgraded the wireless infrastructure which included approximately 6,000 access points (APs). Our engineers also upgraded core network infrastructure at the data center, upgraded the uninterruptible
