## Construction Manager At-Risk Services

HWH has a long history of providing quality projects that are on time and in budget. The CM At-Risk method of construction delivery allows us to use our expertise to provide the Architect and Owner with valuable budgeting and constructability analysis during the design phase. This pre-construction analysis aids the design team as they work to provide a functional environment within the Owner's budget.

When the plans are ready, we will be there to bid the project. With our extensive network of specialty trades contractors, we can provide excellent bid coverage and ensure competitive pricing. During the bidding process, we will work to qualify the proposals and select the contractors that present the best value to the project. These proposals will be used to provide the Owner with a Guaranteed Maximum Price for the project.

By acting as a consultant to our client during the development and design phases, HWH is able to utilize the expertise of our team to increase the value added features and functionality for each project.
