

Disparity & Availability

Equity in contracting to impact communities for good.

We are one of the largest solutions providers of disparity studies and proud to have conducted more unchallenged studies than any other consultant firm in the country. Our team of experts has helped clients produce accurate, valid, and legally defensible disparity studies that engage the community and stakeholders. We work on high-profile, racially sensitive studies to provide recommendations for true social change.

Availability and Disparity Studies

All of our prior completed disparity studies have withstood legal challenges and are defensible because our utilization methodology and data collection processes are best-in-class and holistic. We believe equity is foundational to our solutions to advance marginalized communities.

M/WBE Program Implementation

Partnering with cities, counties, and state agencies to establish the structure, operations, and systems to support compliance and enforcement is part of our storied 50-year history. We co-create M/WBE aspirational goals consistent with court/legal rulings and to establish economic equity.
