2025 PRICE GUIDE

Interior Design Collection

A Studio of Fabric Images®

Bringing Life to Your Vision.

In the world of interior design, light and sound play a critical role in how people experience a space.

Our line of acoustic décor products combines form and function, delivering visually inspiring, sound-absorbing solutions that help create comfortable, purposeful spaces. Each category offers a unique approach to sound absorption, ensuring an effective treatment based on the unique layout and needs of each space.

Equally experiential, illuminated art delivers a new level of visual impact and spatial versatility for interiors. Our highly adaptable, perimeter lit framing system pairs with high resolution, printed fabric artwork to create focal points that drive the visual and spatial aesthetic of the space.

For over 30 years, we’ve collaborated with designers to create innovative solutions for interiors, live events, and retail environments. We thrive on innovation, collaboration, creativity, and the pleasure that comes from bringing life to our customer’s vision.

Solutions for Sound Enhancement

CUSTOMIZATION

The material attributes of Acusti-fi™ offer endless creative possibilities for interior spaces.

Speci·fi™

Choose the colors that work best for your space. Acusti-fi is available in 20 standard colors, eight wood textures and five stone textures. If you don't see a color that works for you, let's talk about printing. We can print customized patterns and artwork unique to your specified design and style.

9mm Acoustic Felt

Wood Textures

Stone Textures

Modi·fi™

From material to masterpiece. Choose the finishing details that define your space. Acusti-fi™ accepts the following:

CUT

Create a composition that defines the personality of your space. Acusti-fi beautifully accepts precision cut patterns and shapes. Choose from pre-designed options or work with us to design and create your own.

V-CARVE™

V-Carve is a texturizing technique that creates depth. Lines are sculpted away from the surface of the Acusti-fi material, offering beautiful tonal patterns. Choose a standard pattern or collaborate with us to create your own.

PRINT

Fi™ Interiors print capabilities are second to none. We use state-of-the-art print technology to digitally print onto the Acusti-fi material, which offers vibrant output, excellent resolution, all without compromising the sound absorption qualities of the material.

POWDER COAT

Where metal details accentuate the design, a powder coated finish adds elegance to the solution. A selection of colors is available. Talk to us about the options.

DESK
PARTITIONS

Making personal space a priority, Desk Partitions offer privacy where it's needed—at our workspace. The simplistic nature of the enclosure impacts focus by offering visual separation and addressing noise levels.

Personal space should look great! Add personality to Desk Partitions by designing graphics that can be digitally printed on the outside and inside surfaces.

ILLUMINATED
ART

Illuminate and Captivate

The presence of illuminated art in interior spaces enhances the ambiance with added light, brilliant color, and inspiring visuals. Blaze™ combines large format, digitally printed fabric with a sophisticated, perimeter lit framing system to deliver an innovative alternative to vinyl and painted murals, or traditional artwork.

* Frame offered in stock colors and can be modified upon request with powder coating.
** Two fabric options available. Connect with our team to determine the best option based on your specific artwork.

** Two fabric options available. Connect with our team to determine the best option based on your specific artwork.
*** Unprinted opaque liner recommended for freestanding units to maximize light output through printed graphic.

DIGITAL PRINTING

Artwork and graphics tell a story. Digitally printing graphics on the surface of Acusti-fi™ enables graphics to be heard, in a quieting sense. Design your own graphics or choose from our library of options. Either way, it is your story to tell.

At Fi™ Interiors we adopted the latest, cutting-edge print technology to provide consistent output across a wide variety of substrates. In addition to color consistency and efficiency offered by our print technology, the process has an additional white color channel allowing for artwork to stand apart from traditional CMYK outputs.

As a brand of Orbus® Visual Communications Group, Fi Interiors is a G7 Master IDEAlliance certified printer. Our graphics department produces high-quality, consistent and accurate color graphics on state-of-the-art equipment.

- 8 color process CMYK
- Higher resolution quality
- Water-based ink
- Continuous color tones
- Increased color gamut of Pantone colors
- Smooth transition of blended colors
- 5th color overprint - White
- Consistency in colors across media

POWDER COATING

Where metal details dress the design, the finish is a fundamental accessory. Powder coating is a finishing method that adds beauty and class to metal, allowing the metal to be one with the design.

At Fi Interiors we believe in limiting environmental impact, which is one of the many reasons we have chosen powder coating over conventional paint applications. This process allows us to minimize the release of volatile organic compounds (VOCs), thus making powder coating an eco-sensitive alternative.

The powder used in this process is a mixture of finely ground particles of pigment and resin, which is sprayed onto a surface to be coated. The charged powder particles adhere to the electrically grounded surfaces until heated and fused into a smooth coating in a curing oven. The result is a uniform, durable, high-quality, and attractive finish.

Does your space have the mood for something different? Talk to us about the powder coating color options. There are too many to count!
