

ICON Signals™ Monitoring & Alerting

TIPS Contract #200203 Security Systems Products and Services

Background

ICON Signals™ monitors sensors in a customer’s environment and alerts designated people, groups and systems when something happens. The event could be triggered by security or environmental sensors, panic buttons, existing third-party systems (fire, alarm, access control, weapons detection, video) and more. Immediate mass notification is managed by Signals™ and delivered via email, text message, mobile devices, voice calls, audible and visual alerts.

ICON - A Texas Company

ICON is a Texas company based in Coppell, Texas. Signals™ is designed, developed and supported right here in the USA.

ICON Signals™ and Alyssa’s Law

Signals™ is perfect for any organization or business looking to enhance safety and security including K-12, higher education, municipalities, hospitality and more.

Signals™ has particular appeal for Alyssa’s Law Compliance. Alyssa’s Law was started by the parents of a 14-year-old that was a victim in the Marjory Stoneman Douglas High School shooting in 2018. The law calls for the installation of silent panic alarms that are directly linked to law enforcement. Below is the link to the “make our schools safe” website that provides detailed information about the legislation and shows each state that has either enacted the law or has pending legislation.

Mobile Panic Button Options

Signals™ empowers teachers and staff to summon help wherever they are on campus with our integrated mobile panic button solutions. Activated using either a wireless pendant or smart phone app, response time is expedited by providing the appropriate personnel and first responders with detailed, situation-specific alerts that include location information.

Send alerts to designated staff and first responders
