### Overview

AssetWorks FleetFocus is a web-based, integrated fleet and asset management solution housed on a single database (Oracle or MSSQL) that provides customers a streamlined approach to managing their fleet's needs. FleetFocus's capabilities provide real management input and analysis, which in turn, helps operations meet their long- and short-term productivity and financial goals. These potential savings result from a wide range of management actions taken in response to conditions identified or highlighted by FleetFocus, such as: Cradle-to- Grave Equipment and Vehicle Tracking Work Order Management Warranty Management Parts Inventory Management Drill Down Reporting and Key Performance Indicator (KPI) Dashboards Role-Based System Security Latest Web-Based Technology FleetFocus is a comprehensive, proprietary software that can be purchased as an on premise, SaaS, or vendor-hosted solution. It is capable of tracking an unlimited number of equipment units and supports an unlimited number of workstations from any number of locations. FleetFocus tracks all functions related to the maintenance of equipment, including processing repair and PM work orders, commercial and warranty work as well as tracking operating expenses such as inventory, labor, fuel, oil, indirect expenses and licensing costs. FleetFocus uses role-based security and allows specific access to be tailored through web-portals displaying to the user those functions specific to his or her job. Additional optional modules offer functionality related to motor pool reservation tracking and AVL/GPS integration. All delivered modules are fully integrated and operate seamlessly within the application.
