Overview

A legacy of leadership in engineered HVAC solutions

Varitec is a leader in the engineering, development and installation of large-scale, energy-efficient HVAC systems for commercial buildings. Whether the objective of a customer is to start from scratch, upgrade an existing system, or set up an ongoing service and maintenance plan, we pride ourselves on being a single source for mechanical contractors, engineers, building owners, and general contractors alike. We attribute the sustained success of Varitec to our exemplary employees and dedication to providing world-class products and services. The tradition of excellence we hold to as a company begins with the ability to represent superior products from a variety of manufacturers. While the integrity of merchandise guarantees that our clients will consistently receive a package of unmatched quality, offering numerous brands enables the engineers to design customized systems that are an exact match for any budget and specification. The "Wet Side" of our business emphasizes quality systems that make and distribute conditioned air inside occupied spaces. Through products manufactured by world's leading HVAC companies, we're able to support any air conditioning application in hospitals, schools, stadiums, resorts, office buildings, and other commercial facilities. On the "Dry Side," Varitec's experienced staff provides the fans and air distribution equipment needed to keep air moving through the HVAC system. We engineer, install, and maintain your system to the standards of excellence you demand.
