Overview

GeneIQ is a molecular, diagnostic-testing laboratory specializing in real-time reverse transcriptase polymerase chain reaction (RT-PCR) testing for COVID-19. Our state-of-the-art laboratory is based in the Dallas metroplex and services corporations, long-term care facilities, physician practices, state and local governments, small businesses, and many organizations and clubs throughout the United States. We have created a highly efficient, automated lab process with a paperless, web-based system that provides 24-to 48-hour turnaround of results after receipt of the specimen. Our testing methodology accurately identifies with 97% sensitivity, if the virus is currently present, and with 99.9% specificity, if the virus is not. Our support and management teams are passionate about providing the highest level of service to our clients.
