Overview

Five Star Technology Solutions has been helping K-12 school districts meet the technology needs of their students and staff since 2005. Our mission is to serve as a catalyst for innovation so school leaders can be empowered to achieve their vision of excellence. From Data Analytics to Staff Evaluations, our team can meet your district's unique needs across a wide range of pain points.

Data Analytics - We understand how frustrating, overwhelming and confusing data can be. Districts have access to seemingly limitless information but often don't have the time or skills necessary to act on the information. That's where our team comes in. We help school administrators and teachers use data to become more focused, empowered, and confident in their actions.

Chromebook Engagement Dashboard - Managing your fleet of Chromebooks is a time-consuming task. Tracking missing devices, identifying auto-update expiration dates, and determining which Chromebooks are not being used are all crucial elements to keep your IT team working proactively. The Chromebook Engagement Dashboard gives your team unparalleled insights into your district's Chromebooks. With a simple sync between your SIS and Google Admin Console, you'll be able to see your data like never before.

K-12 Staff Evaluations - Educators are the first and foremost resource when it comes to providing quality instruction and leadership for students. How can your organization develop and grow an effective staff to positively impact student achievement? It all begins with an easy-to-use system to help manage and maximize professional learning opportunities.
