Overview

Centennial is a national leader in renovation, infrastructure improvements, new construction, sustainable initiatives and emergency services for facility owners. We operate a nationwide network of more than 30 offices led by construction professionals who share a common goal: to keep promises, honor commitments and exceed client expectations. Our performance helps forge strong partnerships, which are strengthened over time. Centennial tailors its performance-based approach to best address owner requirements. Centennial adapts its proven systems to ably address project intricacies, whether through job order, task order, design-build, construction management, integrated delivery, on-call, renovation, or new construction contracts. People constitute Centennial's key differentiator – professionals committed to operating at the forefront of performance-based construction and contributing daily to mutually beneficial, long-term client partnerships. Our core business is to provide construction solutions, resources, and support for facility owners and managers. We especially focus on design-build and facilities renovation, repair, and remodeling. Relationships are at the heart of our business. Rather than focus on a single project or process, we strive for long-term relationships with our customers relationships built around dependability, responsiveness, results, and most importantly, trust. Unlike other construction companies, Centennial acts as an extension of your facilities construction and support team. We also take pride in responding creatively to construction and renovation challenges while still maintaining a results-oriented approach. Centennial's contracts involve renovation, alteration, construction design-build and repair-type projects requiring the management of multiple subcontractors on a wide variety of trades on multiple projects simultaneously. Centennial management and project controls have been developed over the course of completing more than 40,000 projects worth more than \$4 billion. This specialization has helped Centennial to refine our management tools, systems, and procedures to meet the ever-changing needs of our clients.
