Overview

Our core focus is power generation, and our professionals are committed to ongoing professional development to hone their skills with the latest technologies and industry requirements. We provide total solutions from identification of the right power system, to equipment sales, service maintenance, emergency support, rental and parts.

The scale of our operation is a unique aspect of our business. Clifford Power Systems has 12 locations spanning a five-state region, and we maintain the local, personalized client service approach combined with the resources of a large company.

Additionally, we provide services 24 hours a day, seven days a week. We call it the power of dependability. This gives our clients peace of mind — knowing they will always have power when and where they need it
