Overview

Clear Energy Solutions is an energy services company with years of experience providing turn-key lighting retrofits. Our principals have custom-engineered lighting retrofits for hundreds of millions of square feet. We are technology and brand neutral. Our loyalty is to our customers. While others may try to lead you to the one system they sell, we present multiple retrofit solutions including the latest LED technology. We take the long view, stressing total operating cost of installed equipment over its life, not just initial capital cost.
