Overview

Def-Logix, Inc. a provider of innovative technological expertise and solutions to our customers. Def-Logix is a certified small business headquartered in San Antonio, TX, offering 10+ years' experience in specialized professional services in computer network security, with an emphasis in software architecture and engineering. Our focus on research and development has allowed us to advance state-of-the-art, developing technologies and products that serve the critical and immediate needs of our government and commercial customers. An emerging leader in the provision of information assurance, intelligence, and information technology services to the Defense, Intelligence and Commercial communities. We have successful experience being sub-contractors and prime contractors to other small and large businesses on various Federal Government contracts. Our insight to government customer needs has led us to perform and meet their requirements through the successful deployment of our custom software solutions and modules onto Air Force systems and through existing DoD HBSS infrastructure. Our corporate experience servicing government clients consists of integrating and developing applications for network forensics, intrusion detection/prevention and exploit detection/prevention. We also evaluate commercial, government and open-source software applications and appliances. Through successful demonstration these products have shown capability of monitoring system firmware and detecting malware before it can cause harm to an organizations most critical asset: their data.
