Overview

Anatomage is the global 3D medical application leader. Our products are currently installed and used in thousands of universities, institutions, clinics, and hospitals all over the US and world-wide. The Anatomage Table is the most technologically advanced 3D anatomy visualization system for anatomy education and is being adopted by many of the world's leading medical schools and institutions.

The Anatomage Tables are a fully interactive, comprehensive 3D visualization tool with an intuitive hands-on interface allowing for quick analysis and examination, for medical education, patient diagnosis, and dynamic presentations. Our products feature the most accurate human anatomy and patient data of any technology available. Powerful hardware and software makes our product the preferred solution for medical applications.

The Table contains life-sized male and female gross anatomy. Including four full-body 3D cadavers ensures that students will be exposed to anatomical variation associated with difference in age, sex, and clinical history. The Anatomage Table based education is proven to be effective. Growing publications show improved test scores, more efficient class and lab sessions, and student acceptance. The Table allows students to interact with young and well preserved digital cadavers instead of aged and degenerated bodies. The accurate details and rich content draw students' interest and attention leading to more effective educational outcomes.

The Anatomage Table is the advanced technology available for your institution. Students, parents, alumni, or visitors will be impressed with the presence and visual impact of the Table. There are no chemicals, no unpleasant smell, no recurring facility costs, no regulations and a higher student adoption rate over traditional cadavers. This system could set your institution as the technology leader in your community.

assistants, or students. Tables can be used as the primary resource in a lab or in conjunction with other anatomy resources such as models, live-subject activities, and dissections.

Anatomage has created activities that can be used with Table, all of which you have access to. These activities can be edited and customized based on the needs of your courses. If you would like additional materials prepared for your curriculum, Anatomage is more than happy to collaborate with you to create custom content. In the past we have created activities, presets, screenshots, and videos, and are open to all potential collaboration opportunities.

Anatomage Goods - Anatomage Table (Standard and Convertible), Clinical, Alpha, Science software, eBook, Tablet, and VR.

Warranty - All Anatomage Products come with first year of warranty which can be upgraded to a total of five (5) years of warranty.
