Overview

TeamDynamix is a single platform for service delivery (with an integrated portal, Service Catalog, and Knowledge Base), resource capacity planning, project and portfolio management.

TeamDynamix is explicitly designed for the public sector market, and it represents a philosophically different choice from corporate solutions. The focus of our solution is on work management and resource optimization across campus including IT, Facilities, Resident Life, HR, Marketing, and more.

For most IT teams, demands are evolving more quickly. Clients are more mobile, more demanding, and resources are more constrained than the private sector. There also tends to be an increased sharing of resources across multiple functions. For this reason, our primary focus is on practical and optimal resource management to drive a culture of successful fulfillment of the Institution's value-add work endeavors.
