### Overview

*Founded at the MIT Media Lab, Learning Beautiful provides hands-on materials and curriculum for young children to learn the basics of computational thinking, without using computers. Our approach aligns with the science of early childhood development in order to introduce technological concepts in a sensorial way that enriches each child's unique development. Our Classroom Set provides a foundation for children ages 3-9 to learn introductory concepts behind how computers work. We provide complete lesson plans and children's books to support learning in the classroom. Our materials are inspired by the proven-effective approach of the Montessori Method, and are intended for all types of educational settings. In addition to physical materials, we provide educator training both in-person and virtual.*
