### Overview

*Skill Struck offers several different programs covering Computer Science, Typing, Robotics, and AI. Our programs include:*

*The Launch Pad (K-5) platform helps students build a foundation of computer science through a variety of engaging and rigorous learning activities. Students learn block coding, computational thinking, HTML syntax and more.*

*The Voyage (6-12) platform engages students in real-world computer science learning through coding projects, self-paced curriculum, and additional learning activities. Students using Voyage prepare for real-world jobs. Voyage includes AP CSP and Industry Certification Courses.*

*Our AI product, Chat For Schools, Skill Struck is a platform that provides schools and districts with cutting-edge technology to enhance teaching, learning, and student engagement in a safe, productive manner. Our solution leverages advanced language models and customizable AI tutoring capabilities to create personalized, standards-aligned learning experiences augmenting classroom instruction. Chat For Schools also includes an Intuitive AI Chat Interface, Specialized AI Tutors, Teacher Productivity Suite, Student and Teacher Training, Safety and Monitoring, and Implementation and Support.*

*The Type Station platform helps students improve their type accuracy and productivity. They progress through a typing curriculum that engages them through games and activities, while preparing them for long form paragraphs and coding.*

*The Robotics platform is an introductory course to robotics that leverages micro:bit. Students learn how to display lights, detect temperature, register movement, and play music with the micro:bit computer using block or Python code.*
