Overview

SportsArt America Inc dba SportsArt Fitness started in 1977 as a supplier of high-quality OEM parts for other manufacturers. It soon became apparent to Paul Kuo, company founder, that the only way to fulfill his mission—to engineer beautiful, smart, innovative products and technologies that sustain the health of people and our planet—was to develop products under his own brand. Since that time, SportsArt has established itself as a pioneer in sustainable fitness, innovating design and manufacturing premium fitness equipment that helps people reach their highest potential and protects our planet. The heart of SportsArt’s brand comes together in our ECO-POWR® line, the world’s only energy-generating cardio equipment. Featuring our patented technology, ECO-POWR® captures 74% of the energy generated during a workout and feeds it back into the grid. Along with ECO-POWR®, SportsArt offers a full range of high-quality cardio, strength and rehabilitation equipment for the fitness, medical and residential markets. Our customers have come to trust SportsArt for our dedication to service, durability and cutting-edge technologies. Our state-of-the-art, 500,000+ square foot manufacturing space is ISO-14001 certified, enabling us to design, manufacture and test our products in a way that reduces overall environmental impact. Today, SportsArt is one of the world’s largest single-brand manufacturers and sold in over 70 countries. We believe that every step, pedal, and stride is an opportunity to power a movement and change the world—one workout at a time. By creating fitness solutions that positively impact users, partners and our planet, SportsArt is inspiring performance for our shared world.
