Overview

We're a solar light manufacturer that is making advanced solar street lighting available to more people and places, so they can see their world in a whole new light. Some of those places are hot and getting hotter, while others get so cold that they cripple our competitor's batteries. Thanks to Fonroche's battery research, our systems take on all kinds of climates. Every lighting system we sell is validated by an energy study specific to your project location.

Providing public lighting isn't like lighting your patio. Our product development team targets the needs of local governments, businesses, and schools. Reliability, durability, and connectivity are at the core of our solar street lighting product design and manufacturing processes.

Fonroche solar lighting has some of the brightest LED fixtures in the solar street lighting industry, but bright light isn't the whole story. We provide options that comply with dark-sky, local ordinances, and IES light guidelines. For communities concerned about blue light and circadian rhythms, we offer shielding and warmer color temperatures.

Because over 150,000 SmartLights are successfully deployed world-wide, we have the strength and scale to back our warranties and provide parts and service in the future.

As manufacturer Fonroche is able to provide material and installation on specific projects.
