Overview

<p>GoSchoolBox Inc. DBA Evress Analytics-Evress quantifies the Return-on-Investment (ROI) of money spent on programming through proprietary implementation monitoring technology. For example, a school district may want to assess the current impact of their literacy tutoring programs on their interim assessments and then work to increase student engagement with the evidence-based programs while still being good stewards of budgetary funds. Evress Analytics delivers quantitative reports to determine the best “bang for the buck” for programming. A web-based, stand-alone solution that centralizes and improves many fragmented data analyses into one safe and secure place, Evress Analytics’ customized platform streamlines the ingestion, cleaning, and reporting of student engagement data to build comprehensive impact reports. Evress Analytics’ proprietary platform uniquely ingests and cleans student engagement data while simultaneously importing district-owned assessment and outcomes data to reliably calculate the resulting impact via a Cohen’s D effect size analysis, thereby measuring the strength in the relationship between said student engagement and student outcomes. With Evress Analytics, partners have a centralized decision making partner that augments and empowers the data and assessment teams at the school district.</p>
