Overview

Digi International is the leader in the management and safekeeping of food, equipment, and temperature dependent products. SMART Temps® Temperature Management System uses a patented, cloud-based solution to accurately capture, document, and report equipment and food temperatures via a secure wireless network to the SMART Command Center® Website 24/7/365. The SMART Command Center® allows authorized users to customize the parameters for monitoring critical control points via the SMART Guard® and SMART Shield® Temperature Monitoring Units. The SMART Alert® System then sends the appropriate personnel notifications via phone, text, and/or email messages when a critical limit has been breached -minimizing inventory losses and potential food safety concerns.
