Overview

<p> Established in 1953 in Salisbury, NC, Power Curbers manufactured the world's first automatic curb machine. The original machines, extruders used in forming small curbs, are still manufactured as the Power Curber 150 extruder. Today, Power Curbers manufactures industry-leading concrete slipform equipment for curb and gutter, highway barriers, sidewalks, ditch liners, and agricultural applications. The best-selling 5700 series machine is contractors' number one choice worldwide, with units sold in over 100 countries. Based in Cedar Falls, IA, Power Pavers manufactures a full line of concrete paving equipment used in street, highway, and airport construction. In addition to slipform pavers, Power Pavers manufactures texture/curing machines, placer-spreaders, and form pavers. Both facilities embrace the latest developments in lean manufacturing, cutting waste, and improving response time for an unmatched customer experience. Keeping things simple is accomplished through focused engineering, factorydirect sales, parts, and service support. Power Curbers & Power Pavers continue to drive the slipform industry through organization partnerships, innovation, and complex project solutions.</p>
