Overview

SoundThinking® is a global leader in gunshot and weapons detection. The company's products are trusted by more than 160 U.S. cities to help make their communities safer. Our SafePointe® solution can swiftly detect, analyze, and respond to the introduction of firearms, firearm components, tactical knives, and metallic bomb components into a facility. SafePointe is designed to identify concealed weapons entering a facility while ignoring common metal items such as cellphones, laptops, or keys. SafePointe screens for concealed weapons without disrupting traffic flow or requiring a staffed security position monitoring system activity unless a weapon is detected.
