Overview

Wired Technology Partners leverages technology to empower teachers to make lasting impacts. We provide ongoing IT support and offer comprehensive tech products and services to meet your school's needs.

Hardware & Software

Wired Technology Partners offers a wide range of hardware and software products. Networks, servers, desktops, laptops, Chromebooks, carts, displays, document cameras, software, etc.

Video Surveillance Systems

IP Video surveillance systems are essential to protecting students and teachers. We have extensive experience installing and managing IP video security systems for K-12 schools.

Physical Access Control Systems

Ensuring secure access to your school is critical to the safety of your students and staff. Our team installs and oversees physical access control systems that include: electric door locks, credential readers, key fobs, and cards. We work closely with you to create an access control plan to keep your school secure.

Structured Cabling

A quality cabling installation is the foundation of a stable network. From a single cable install to wiring an entire school, our trained installers will run and terminate Cat6 and fiber optic cabling.

Audio / Video Systems

We are always excited to upgrade schools from projectors to interactive touchscreen displays in the classrooms. This latest technology allows teachers to move from teaching behind a laptop to the front of the classroom, facing their students. Our team also specializes in installing classroom speaker systems and large room projector systems.

Wired offers reliable communication solutions with proven IP phone system vendors. We install and maintain these systems in the office, the classroom, or other common areas.

Overhead Paging
Overhead paging systems are helpful in all-call messages and critical emergency notifications. Our team is trained to install distributed paging systems throughout the school, so your students and staff can stay safe and up-to-date.
